It was in 1967 68 that I wrote the book Economic relations between the two Europes and the socialist international cooperation published in 1970 Its main message may be summed up as follows 1 Between economic development and underdevelopment exists a state which stabilizes under capitalist economic and world economic relations and constitutes a particular peripheral zone around the developed cores of the world economy It is a historic feat of the European socialist countries to have broken out of this peripheral situation and to move towards the complete liquidation of their historical backwardness 2 The position of the group of European socialist countries in world economy and within it in Europe is determined by the asymmetry which is at the same time the most characteristic feature of their domestic development namely that the traditional extent and manner of their participation in the international division of labour no longer corresponds to their development requirements their having become much more developed and exacting At the same time their full participation in the division of labour of the highly developed countries is still hindered beyond the deliberate and spontaneous repressive efforts of the West by the fact that their forces of production have not yet reached an advanced state This is what makes East West economic

relationships even more contradictory and constitutes a menace to every effort made in this direction 3 **Zur weiteren Entwicklung der sozialistischen ökonomischen Integration**, 1986 The Program for Socialist Economic Integration Jozef M. van Brabant, 1971 *Socialist Economic Integration and World Economic Relations* Leonid Vasil'evich Krasnov, 1975 The Institutions of Comecon Giuseppe Schiavone, 1981-06-18 **The Market of socialist economic integration**, 1973 **Legal problems of socialist economic integration** Búlgarska akademii a na naukite, 1977

**World Economy and Its Main Development Tendencies** J. Nyilas, 2013-06-29 A great many socio economic events of the utmost importance have taken place in rapid succession in the historically short period of hardly more than three decades After the Second World War the pace of socio economic progress has experienced an unprecedented acceleration This is nothing new in itself Social formations and the corresponding productive forces prior to socialism had also followed each other at a rapidly increasing rate Acceleration can also be witnessed in the accumulation of human knowledge in the fields of science and technology Parallel with the development of the productive forces the growth of population has been exponential More than one and a half thousand years were needed for the world population to double since the beginning of our era whereas it takes now less than 40 years The emergence of capitalism the appearance of mechanized mass production brought about a radical change in the general progress of human civilization It opened up the machine age The classics of Marxism highly appreciated the new power and labour machines and the resulting growth in production and stated that the productive forces created under capitalism had far surpassed those brought about by all earlier societies taken together This is true even though the technology of that time looked upon in hindsight had produced hardly more than primitive steam engines and simple labour machines which have by now become for the most part relics of technical history
