Handbook of Social Psychology John DeLamater, 2006-11-24 Psychology focusing on processes that occur inside the individual and Sociology focusing on social collectives and social institutions come together in Social Psychology to explore the interface between the two fields. The core concerns of social psychology include the impact of one individual on another, the impact of a group on its individual members, the impact of individuals on the groups in which they participate, the impact of one group on another. This book is a successor to Social Psychology: Social Perspectives and Sociological Perspectives in Social Psychology. The current text expands on previous handbooks in social psychology by including recent developments in theory and research and comprehensive coverage of significant theoretical perspectives.      Social Cognition and Social Development E. Tory Higgins, Diane N. Ruble, William W. Hartup, 1985-07-26 In psychology there has been an explosion of interest in what has come to be called social cognition. How do people categorise and conceptualise social situations, obligations and relationships? And what are the implications of their categorisations and conceptualisations for behaviour? Developmental and social psychologists are currently converging on the developmental roots of social cognitive abilities. This timely 1983 book offers a useful overview of research and theory concerning social cognition and social behaviour in children at the time of this book's publication. A full range of theoretical approaches is represented, key problems are systematically reviewed and research programmes and perspectives of leading psychologists in the field are summarised.      **Children and Schooling** Philip Gammie, 2012 The book provides a synthesis of a broadly based social psychology of education and bridges the gap between theory and practice in education by emphasising the relationship between research and actuality. The author discusses the major issues in childhood socialisation relating to schooling achievement and the curriculum and in so doing makes a sensitive and well argued case for the social psychological perspective. He presents a social psychologist's view of the interaction between child, school and curriculum and summarises mainstream psychological contributions to current thinking on achievement, self esteem and education. He covers areas of social learning and attribution theory not commonly dealt with in education texts showing that there are major fields of research which have until now been neglected. Children and Schooling is constructed so that its chapters can be used as independent study guides to specific subjects or read in sequence, each subject inter-related. The text can be treated as an introduction, particularly in view of the notes and comprehensive and apposite scholarly apparatus and as a spring board for serious study at advanced level.

**Understanding Children as Consumers** David Marshall, 2010-04-19 What drives children as consumers? How do advertising campaigns and branding effect children and young people? How do children themselves understand and evaluate

these influences Whether fashion toys food branding money from TV adverts and the supermarket aisle to the internet and peer trends there is a growing presence of marketing forces directed at and influencing children and young people How should these forces be understood and what means of research or dialogue is required to assess them With critical insight the contributors to this collection take up the evaluation of the child as an active consumer and offer a valuable rethinking of the discussions and literature on the subject Features 14 original chapters from leading researchers in the field Each chapter contains vignettes or case examples to reinforce learning Contains consideration of future research directions in each of the topics that the chapters cover This book will be relevant reading for postgraduates and advanced undergraduates with an interest in children as consumers consumer behaviour and on marketing courses in general as well as for researchers working in this field

**Young Consumer Behaviour** Ayantunji Gbadamosi,2017-11-22 Although one perspective depicts young consumers as vulnerable and passive in the marketplace system our knowledge of this consumer group will be inadequate if limited to this contention Their roles and relevance in family consumption activities are becoming increasingly profound Available evidence shows that they cannot be ignored in the marketplace dynamics as they consume goods and services in their households and are involved in various other active roles in their household consumption including making decisions where applicable Hence the landscape of young consumer behaviour is changing **Young Consumer Behaviour A Research Companion** focusses on exploring the behaviour of young consumers as individuals and societal members The chapters address different aspects of consumption activities of children as individuals like motivation involvement perception learning attitude the self and personality Similarly chapters on consumer behaviour in social settings contextualised to young consumers including culture sub culture family and groups are incorporated into the book This book fills a gap in the literature by addressing the dynamics of consumption patterns of this consumer group in relation to various marketing stimuli and different stakeholders It combines eclectic perspectives on the topic and specifically bridges the gap between historical perspectives and contemporary issues Building on the extant literature in the field of marketing and consumer behaviour this book is a compendium of research materials and constitutes an essential reference source on young consumer behaviour issues with both academic and managerial implications
