Sociology And Free Will:

The Social Psychology of Good and Evil, Second Edition Arthur G. Miller, 2016-07-03 This timely accessible reference and text addresses some of the most fundamental questions about human behavior such as what causes racism and prejudice and why good people do bad things. Leading authorities present state of the science theoretical and empirical work. Essential themes include the complex interaction of individual, societal and situational factors underpinning good or evil behavior, the role of moral emotions, unconscious bias and the self concept, issues of responsibility and motivation, and how technology and globalization have enabled newer forms of threat and harm. Key Words: Subject Areas: aggression, altruism, antisocial, evil, free will, good, guilt, heroism, human behavior, morality, prejudice, prosocial, racism, shame, social psychology, stereotyping, terrorism, values, violence. Audience: Students and researchers in social psychology, also of interest to sociologists.

What Social Robots Can and Should Do Johanna Seibt, Søren Schack Andersen, 2016-10-14 Social robotics drives a technological revolution of possibly unprecedented disruptive potential both at the socio economic and the socio cultural level. The rapid development of the robotics market calls for a concerted effort across a wide spectrum of academic disciplines to understand the transformative potential of human robot interaction. This effort cannot succeed without the special expertise in the study of socio cultural interactions, norms and values that humanities research provides. This book contains the proceedings of the conference What Social Robots Can and Should Do: Robophilosophy 2016 TRANSOR 2016 held in Aarhus Denmark in October 2016. The conference is the second event in the biennial Robophilosophy conference series, this time combined with an event of the Research Network for Transdisciplinary Studies in Social Robotics TRANSOR. Featuring 13 plenaries and 74 session and workshop talks, the event turned out to be the world's largest conference in Humanities research in and on social robotics. The book is divided into 3 sections. Part I and Part III contain the abstracts of plenary lectures and contributions to 6 workshops. Artificial Empathy, Co Designing Children, Robot Interaction, Human Robot Joint Action, Phronesis for Machine Ethics, Robots in the Wild and Responsible Robotics. Part II contains short papers for presentations in 7 thematically organized sessions: methodological issues, ethical tasks and implications, emotions in human-robot interactions, education, art and innovation, artificial meaning and rationality, social norms and robot sociality, and perceptions of social robots. The book will be of interest to researchers in philosophy, anthropology, sociology, psychology, linguistics, cognitive science, robotics, computer science and art. Since all contributions are prepared for an interdisciplinary readership, they are highly accessible and will be of interest to policy makers and educators who wish to gauge the challenges and potentials of putting robots in society.

The Birth of Solidarity François Ewald, 2020-05-08 François Ewald's landmark *The Birth of Solidarity* first published in French in 1986, revised in 1996, with the revised edition appearing here in English for the first time, is one of the most important historical and philosophical studies of the rise of the welfare state. Theorizing the origins of social insurance, Ewald shows how the growing problem of industrial accidents in France

throughout the nineteenth century tested the limits of classical liberalism and its notions of individual responsibility As workers and capitalists confronted each other over the problem of workplace accidents they transformed the older practice of commercial insurance into an instrument of state intervention thereby creating an entirely new conception of law the state and social solidarity What emerged was a new system of social insurance guaranteed by the state The Birth of Solidarity is a classic work of social and political theory that will appeal to all those interested in labor power the making and dismantling of the welfare state and Foucauldian notions of governmentality security risk and the limits of liberalism **The Freewill**
