Patten, Gary C. White, 1979 *Scientific and Technical Aerospace Reports*, 1979 **Ecological Physical Chemistry** C. Rossi, Enzo Tiezzi, 1991 A great debate has arisen about the necessity to distinguish between different physical chemistry approaches for investigating the behavior of natural systems On the one side it is necessary to recognize that the use of time reversible classical and quantum physical chemistry approaches for studying molecular systems yields a big improvement in man's knowledge On the other hand it is imperative to have new approaches new time irreversible theories able to describe these relationships Ecological physical chemistry is a new transdisciplinary field of study that addresses the relationships between complex molecular systems and or organisms This new field goes beyond the normal conceptions of scientific disciplines and tries to integrate and harmonize many different disciplinary perspectives Ecological physical chemistry thus wants to develop new theories and strategies for investigating the complexity of nature and the present book is the first report on this intriguing new scientific discipline **Mineral Cycling in Southeastern Ecosystems** Fred G.
