Social Town Planning Clara Greed, 2002-01-04 Many issues such as access for the disabled childcare facilities environmental matters and ethnic minority issues are excluded from town planning considerations by planning authorities This book introduces the concept of social town planning to integrate planning policy and practices with the cultural and social issues of the people they are planning for Part 1 provides background on the development of a social dimension to the predominantly physical land use based British town planning system Part 2 investigates a representative selection of minority planning topics in respect of gender race age and disability cross linked to the implications for mainstream policy areas such as housing rural planning and transport Part 3 discusses the likely influence of a range of global and European policy initiatives and organisations in changing the agenda of British town planning Planning for healthy cities sustainability social cohesion and equity are discussed Part 4 looks at the problem from a cultural perspective arguing that a great weakness in the British system resulting in ugly and impractical urban design has been the lack of concern among planners with social activities and cultural diversity Alternative more culturally inclusive approaches to planning are presented which might transcend the social spatial dichotomy such as urban time planning Concluding that the process of planning must change the authors agree that the culture and composition of the planning profession must particularly change to be more representative and reflective of the people they are planning for in terms of gender race and minority composition **Social Town**
