Social Worlds Personal Lives:

Social Worlds/Personal Lives: Chapters 1 & 2 E. Sampson, 1998 **Evil Online** Dean Cocking, Jeroen Van den Hoven, 2018-05-29 I am delighted to offer my highest praise to Dean Cocking and Jeroen van den Hoven's brilliant new book *Evil Online*. The confrontation between good and evil occupies a central place in the challenges facing our human nature and this creative investigation into the spread of evil by means of all powerful new technologies raises fundamental questions about our morality and values. Cocking and Van den Hoven's account of the moral fog of evil forces us to face both the demons within each of us as well as the demons all around us. In the end we are all enriched by their perceptive analyses. Phil Zimbardo, Professor Emeritus of Psychology, Stanford University, Principal Investigator, Stanford Prison Experiment. The internet offers new and deeply concerning opportunities for immorality, much of it shocking and extreme. This volume explains with great insight and clarity the corrupting nature of the internet and the moral confusion it has produced. It will play a vital role in the growing debate about how to balance the benefits of the internet against the risks it poses to all of us. *Evil Online* is an excellent book. Roger Crisp, Professor of Moral Philosophy, University of Oxford. We now live in an era defined by the ubiquity of the internet. From our everyday engagement with social media to trolls on forums and the emergence of the dark web, the internet is a space characterized by unreality, isolation, anonymity, objectification, and rampant self-obsession, the perfect breeding ground for new unprecedented manifestations of evil. *Evil Online* is the first comprehensive analysis of evil and moral character in relation to our increasingly online lives. Chapters consider traditional ideas around the phenomenon of evil in moral philosophy and explore how the dawn of the internet has presented unprecedented challenges to older theoretical approaches. Cocking and Van den Hoven propose that a growing sense of moral confusion, moral fog, pushes otherwise ordinary normal people toward evil-doing and that values basic to moral life, such as autonomy, intimacy, trust, and privacy, are put at risk by online platforms and new technologies. This new theory of evil-doing offers fresh insight into the moral character of the individual and opens the way for a burgeoning new area of social thought. A comprehensive analysis of an emerging and disturbing social phenomenon, *Evil Online* examines the morally troubling aspects of the internet in our society. Written not only for academics in the fields of philosophy, psychology, information science, and social science, *Evil Online* is accessible and compelling reading for anyone interested in understanding the emergence of evil in our digitally dominated world. **The Social Self and Everyday Life** Kathy Charmaz, Scott R. Wilmer,H. van Maanen,2024-04-02 Theatre Worlds in Motion aims to clarify the different theatre traditions and practices in Western Europe from a historical and sociological perspective The book grew out of a perceived need among theatre scholars

who had recognised that while they understood the theatre system of their own country they often found it difficult to discover how it compared with other countries The chapters analyse the basic components and dynamics of theatre systems in seventeen Western European nations in order to elucidate how the systems function in general and how they vary in different cultures The book provides a sense of what has been happening recently in particular countries and indicates how the theatre systems have developed over time and have led to the current practices and structures Each national chapter considers the historical tradition and place of theatre within the country and analyses the role of the state in fostering theatre during the last fifty years Material from the national chapters has been used in two general chapters at the beginning and end of the book to provide an overview to developments in all Western Europe The introductory chapter on decentralisation discusses the tendency amongst governments to encourage cultural development outside the national capital by providing subsidy for regional theatre venues and theatre companies and in many cases by developing the decision making and budgetary powers for the theatre to regional and local authorities The epilogue on the functioning of theatre examines the common structures of theatre in society as described in the seventeen national chapters and it proposes areas for future research
