## **Social Gerontology:**

*The SAGE Handbook of Social Gerontology* Dale Dannefer, Chris Phillipson, 2010-08-13 This SAGE Handbook integrates basic research on social dimensions of aging. It presents programmatic applications of research in areas not often seen in Handbooks including imprisonment technology and aging urban society aged and elderly migration. The authors constitute a Who's Who of international gerontology and the focus on globalization and aging is unique among Handbooks today. This Handbook should be in the library of every social gerontologist. Vern L. Bengtson, Professor of Gerontology, University of Southern California. This volume reflects the emergence of ageing as a global concern including chapters by international scholars from Asia, Australasia, Europe and North America. It provides a comprehensive overview of key trends and issues in the field drawing upon the full range of social science disciplines. The Handbook is organized into five parts each exploring different aspects of research into social aspects of ageing. Disciplinary overviews, summaries of findings from key disciplinary areas within social gerontology. Social relationships and social differences explores areas like social inequality, gender, religion, inter-generational ties, social networks and friendships. Individual characteristics and change in later life examines different aspects of individual aging including self and identity, cognitive processes and bio-social interactions and their impact on physical and psychological aging. Comparative perspectives and cultural innovations. Topics include ageing and development, ageing in a global context, migration and cross-cultural perspectives on grandparenthood. Policy issues covering policy concerns such as long-term care, technology and older people, end of life issues, work and retirement and the politics of old age. This will be essential reading for all students, researchers and policy makers concerned with the major issues influencing the lives of older people across the globe.

**Social Gerontology** Nancy R. Hooyman, H. Asuman Kiyak, 2008 This textbook provides a survey of the field of social gerontology taking a multi-disciplinary approach to the social aspects of aging and/or working with older adults. The authors demonstrate how age-related changes in the biological, functional and psychological domains can influence the older person's interactions with his/her social and physical environment. They offer a view that presents aging positively portraying concepts of active aging and resiliency and defining productive aging by elaborating on the numerous ways elders contribute to society and their families. Based on the latest research findings it offers understanding to critical issues of aging attending to differences by age and cohort, gender, ethnic minority status, sexual orientation and socio-economic status.

**Key Concepts in Social Gerontology** Judith E. Phillips, Kristine J. Ajrouch, Sarah Hillcoat-Nalietamby, 2010-03-18 Far from a dictionary the concepts are portrayed as complex and conflicting definitions and usages are both noted and evaluated. Each article includes a necessarily selective set of references and cross-references to other concepts included in the book. Moreover the coverage and evaluation of the concepts is right at the current leading edge in a rapidly moving field. Victor Marshall, Department of Sociology and Institute on Aging, University of North Carolina at Chapel Hill. The concepts are very clear and very relevant and fantastic for my group of undergraduate students. I found each

concept to be succinctly and simply captured holding enough information to satisfy initial cravings and complex enough to tempt further reading I had originally thought that this book would provide supplementary reading as part of my Healthy Ageing course but have changed my mind to essential reading now I have had the opportunity to read the entire book Dr Meredith Tavener Groningen University Social gerontology is a new and dynamic field reflecting the increasing interest in ageing across the world This book provides a readily accessible guide to well established and contested issues as well as new concepts emerging through cutting edge research in the discipline The entries give concise lucid knowledge on what constitutes the building blocks of social gerontology and sets out a clear review of the core concepts both classic and emerging in this subject area Each concept is explored in terms of its history application usefulness to theory and research and significance in practice They go beyond simple definitions of the concepts to look at how each issue has shaped the discipline of social gerontology today This book is authored by social gerontologists from the UK and the USA Together they present an interdisciplinary perspective and reflect a global approach to the presentation of key concepts in social gerontology

**Old Age in Modern Society** Christina R. Victor, 2013-11-11 Old age is a part of the lifecycle about which there are numerous myths and stereotypes To present an overstatement of commonly held beliefs the old are portrayed as dependent individuals characterized by a lack of social autonomy unloved and neglected by both their immediate family and friends and posing a threat to the living standards of younger age groups by being a burden that consumes without producing Older people are perceived as a single homogeneous group and the experiment of ageing characterized as being the same for all individuals irrespective of the diversity of their circumstances before the onset of old age In this book detailed statistical material is used to portray the circumstances of older people in modern society in an attempt to evaluate the appropriateness or otherwise of the major stereotypes of later life This volume does not address ageing from a psychological or micro social perspective In particular we do not explore major issues relating to old age Rather we feel that from the extensive collection of surveys concerned with the elderly we can provide a context within which individual elderly people can be studied from more anthropological or biographical perspectives

**Social Gerontology** M. B. Kleiman, 1983-05-04 **Social Gerontology** Nancy R. Hooyman, H. Asuman Kiyak, 2005 Appropriate for sociology psychology and nursing students this textbook examines the biological and physiological changes that affect older people's daily functioning their risk of chronic diseases the psychological changes that can occur and the social implications of aging

**The Need for Theory** Simon Biggs, Jon Hendricks, Ariela Lowenstein, 2020-11-25 The Need for Theory speaks to the burgeoning need for critical thinking in social gerontology The editors have brought together some of the foremost contributors to theoretical advances in the field This volume incorporates state of the art theorizing with a focus on selected topical areas facing gerontologists around the world Using their keen insights into substantive issues the contributors examine personal and structural changes affecting individuals over the life course Extolling the need for theory is not enough

the contributors focus their insights on a panoply of substantive issues linking the personal with the political and with the structural parameters that shape the process of aging no matter where it occurs

**Cross-Cultural and Cross-Disciplinary Perspectives in Social Gerontology** Tannistha Samanta, 2016-08-02 This volume intends to re-establish social gerontology as a discipline that has pragmatic links to policy and practice Collectively the chapters enrich public debates about the moral cultural and economic questions surrounding aging thereby ameliorating the problems associated with aging societies This volume is uniquely cross cultural theory driven and cross disciplinary It fills a gap in the gerontological scholarship of the global south that is predominantly descriptive and empirical Based on original research this volume examines in particular the sociological question of inequality and its intersection with age gender health family and social relations In the process the studies herein highlight the unique historical institutional and social systems that govern the subjective experience of aging in diverse contexts globally Specifically societies in transition including India Lebanon Nigeria Japan China Israel and in Europe are studied while connecting the micro social experience of aging loneliness wellbeing discrimination relationships and resilience with larger temporal and political contexts This exercise generates intellectual capital that reformulates links between aging research and policy in innovative ways Overall the volume echoes the global scientific commitment to understand the socio cultural process of aging in transitional societies and utilizes rich opportunities for cross fertilization of ideas disciplines and methods to advance the gerontological promise of critical inquiry training and practice

**Becoming Old** John Crossley Morgan, 1979

**Researching Social Gerontology** Sheila M Peace, 1990-09-28 This accessible introduction to key concepts methods and issues in social gerontological research presents a unique view of the research process by focusing on the relationships between conceptual definition and research methodology and between research policy and practice At a theoretical level the text draws on the core gerontological concepts of age dependency social support and quality of life to illustrate their complexity and the difficulties of measurement On a practical level the contributors present a number of methodological approaches which have been particularly useful in social gerontological research Finally they consider three critical issues whether old people require special ethical consideration the prospects for funding and the importance of disseminating research effectively Researching Social Gerontology has been specially commissioned by the British Society for Gerontology to outline current thinking in conceptual and methodological development and the context in which gerontological research is being carried out As such it will prove stimulating and useful for researchers at all levels practitioners policy makers and those with a more general interest in the ageing process

*Ageing in Society* John Bond (BA.), Peter G. Coleman, 1990 Drawing on theoretical perspectives from sociology psychology and biology the authors aim to introduce the reader to an understanding of the ageing process and to present a more positive view of human ageing

**Social Gerontology** Chiyo Omachi, 1985

*The Aging Experience* Russell A. Ward, 1979

**Handbook of Theories of Aging** Merrill Silverstein, Vern L. Bengtson, Vern L.

Bengtson, PhD, Norella Putney, Daphna Gans, 2008-10-27 The field of gerontology has often been criticized for being data rich but theory poor. The editors of this book address this issue by stressing the importance of theory in gerontology. While the previous edition focused on multidisciplinary approaches to aging theory, this new edition provides cross-disciplinary integrative explanations of aging theory. The contributors of this text have reached beyond traditional disciplinary boundaries to partner with researchers in adjacent fields in studying aging and age-related phenomena. This edition of the Handbook consists of 39 chapters written by 67 internationally recognized experts in the field of aging. It is organized in seven sections reflecting the major theoretical developments in gerontology over the past 10 years. Special Features Comprehensive coverage of aging theory focusing on the biological, psychological, and social aspects of aging. A section dedicated to discussing how aging theory informs public policy. A concluding chapter summarizing the major themes of aging and offering predictions about the future of theory development. Required reading for graduate students and post-doctoral fellows. This textbook represents the current status of theoretical development in the study of aging.

**The Social Forces in Later Life** Robert C. Atchley, 1972

**Researching Ageing and Later Life** Anne Jamieson, Christina R. Victor, 2002 This edited volume addresses the methodological challenges entailed in studying the process of ageing and life course changes as well as the experience of being old. The book focuses on the theory and practice of doing research using a wide range of examples and case studies.

**Reconstructing Old Age** Chris Phillipson, 1998-10-26 In this timely and authoritative overview on social gerontology and social theory, Chris Phillipson outlines the changing contexts and experiences associated with later life as we move into a new century. The book critically reviews the different theoretical explanations which attempt to explain these changes. Phillipson shows how in late modernity changes to pensions, employment, and retirement and intergenerational relations are placing doubt on the meaning of growing old. He suggests that later life is being reconstructed as a period of potential choice on the one hand but also of risk and danger on the other. This book will be essential reading for students and academics in social gerontology as well as for students and academics in sociology, social policy, and related disciplines interested in the future of an ageing population and the future of social gerontology.

**Social Gerontology Today** Elizabeth Warren Markson, 2003 Covering the prominent social, psychological, and biological perspectives on aging and old age, this textbook weighs the positive and negative aspects of the aging process. Gender, race, ethnicity, class, and birth cohort issues are addressed throughout, and social aspects of aging are emphasized. Markson teaches at Boston University.
