Social Assessment in Natural Resource Management Institutions Nick Taylor, Marcus Benjamin Lane, 2001 This book is the first significant international attempt to outline and analyze how social assessment has been integrated within natural resource management institutions to date. In doing so it focuses on contemporary Australian and New Zealand experiences and relates these back to the international context. Social Assessment in Natural Resource Management Institutions provides practical guidance for a wide range of planners, managers and stakeholders striving for better integration of social issues. The lessons derived are equally relevant to national, provincial, regional and local governance structures, international agencies, corporations and community based non government organizations.

*The Theory, Practice and Potential of Regional Development* Kelly Vodden, David J.A. Douglas, Sean Markey, Sarah Minnes, Bill Reimer, 2019-07-04 Canadian regional development today involves multiple actors operating within nested scales from local to national and even international levels. Recent approaches to making sense of this complexity have drawn on concepts such as multi level governance, relational assets integration, innovation and learning regions. These new regionalist concepts have become increasingly global in their formation and application yet there has been little critical analysis of Canadian regional development policies and programs or the theories and concepts upon which many contemporary regional development strategies are implicitly based. This volume offers the results of five years of cutting edge empirical and theoretical analysis of changes in Canadian regional development and the potential of new approaches for improving the well being of Canadian communities and regions with an emphasis on rural regions. It situates the Canadian approach within comparative experiences and debates offering the opportunity for broader lessons to be learnt. This book will be of interest to policy makers and practitioners across Canada and in other jurisdictions where lessons from the Canadian experience may be applicable. At the same time the volume contributes to and updates regional development theories and concepts that are taught in our universities and colleges and upon which future research and analysis will build.
