Social Rules And Social Behaviour

Henry Sidgwick

Social Rules And Social Behaviour:

Social Rules and Social Behaviour Peter Collett,1977 *Social Rules and Social Behaviour* Peter Collett,1975

Teaching Social Behaviour David Warden,Donald Christie,2013-11-26 First Published in 1998 This book is about the development of children s social behaviour about their abilities to engage in social interactions and to form social relationships More specifically it is about the development of good and bad or prosocial and antisocial behaviours Its aim is to contribute to children s social education by providing teachers with a set of classroom tasks and activities which will foster children s prosocial behaviour by encouraging them on a regular basis to discuss interpersonal feelings and behaviours and to consider the feelings and points of view of other children *The Invisible Origins of Legal Positivism* W.E.

Conklin,2012-12-06 Conklin s thesis is that the tradition of modern legal positivism beginning with Thomas Hobbes postulated different senses of the invisible as the authorising origin of humanly posited laws Conklin re reads the tradition by privileging how the canons share a particular understanding of legal language as written Leading philosophers who have espoused the tenets of the tradition have assumed that legal language is written and that the authorising origin of humanly posited rules norms is inaccessible to the written legal language Conklin s re reading of the tradition teases out how each of these leading philosophers has postulated that the authorising origin of humanly posited laws is an unanalysable externality to the written language of the legal structure As such the authorising origin of posited rules norms is inaccessible or invisible to their written language What is this authorising origin Different forms include an originary author an a priori concept and an immediacy of bonding between person and laws In each case the origin is unwritten in the sense of being inaccessible to the authoritative texts written by the officials of civil institutions of the sovereign state Conklin sets his thesis in the context of the legal theory of the polis and the pre polis of Greek tribes The author claims that the problem is that the tradition of legal positivism of a modern sovereign state excises the experiential or bodily meanings from the written language of the posited rules norms thereby forgetting the very pre legal authorising origin of the posited norms that each philosopher admits as offering the finality that legal reasoning demands if it is to be authoritative *Jurisprudence Essentials* Duncan Spiers,2019-08-07 Law students traditionally find the methods of jurisprudence which range across philosophical and sociological approaches to law more difficult than black letter law subjects With few cases confusing questions and no correct answers it can be difficult to draw a balanced view Now Duncan Spiers explains the main ideas of jurisprudence in the order that law students usually encounter them on their courses By extracting the main arguments that lie at the heart of the different positions he makes it clear what the strong central themes and implications are From natural law to justifying punishment and from Marxism to feminism students will gain a firm grasp of theories behind jurisprudence End of chapter summaries clearly define the essential concepts covered to help you to understand the different ideas and intellectual positions *An Architecture of the Mind* Brendan Markey-Towler,2018-03-14 An Architecture of the Mind proposes a

mathematically logical and rigorous theory of lived experience and a comprehensive and coherent theory of psychology It is also remarkably simple Building on the core proposition that the mind is a network structure it proposes a theory of the psychological process as operating within and upon that structure and a theory of behaviour as determined by that process The theory presents a view of the mind which reveals a new perspective on the process of reasoning in thinking and how it may coexist with processes more akin to simple rule following and computation It allows us to understand the role and influence of social influences in the psychological process by revealing their role in and influence on mental networks It reveals the place of motivations in the psyche as complexes in mental networks from whence aesthetics preference and value judgements arise and demonstrates their necessity for behaviour This book is especially useful for the perspective it offers on behavioural change It reveals the conditions under which traditional economic theories of incentives will be appropriate and the conditions under which they will not be This book draws on psychology social science cultural science neuroscience and economics to offer an interdisciplinary contribution which resists the tendency for disciplines to become over specialised and fragmented It will be of interest to any interested in the functioning of the human mind and the government of human behaviour

Intertwinements of Law and Medicine Jan M. Broekman, 1996 The general aim of this book is to discuss a number of important and interrelated issues in life of modern man in medicine and the law That discussion is not only on material aspects of those issues but also on the forms of knowledge which enable us to develop the relevant arguments and to cope with related experiences in everyday life These issues are on the whole understood in terms of the law medicine relationship or the law and medicine interface However a reflexion on the philosophical and cultural basis of those expressions shows the shortcomings of that approach and the need for an understanding of that relationship in terms of intertwining discourses

The Complexity of Social Norms Maria Xenitidou, Bruce Edmonds, 2014-05-28 This book explores the view that normative behaviour is part of a complex of social mechanisms processes and narratives that are constantly shifting From this perspective norms are not a kind of self contained social object or fact but rather an interplay of many things that we label as norms when we take a snapshot of them at a particular instant Further this book pursues the hypothesis that considering the dynamic aspects of these phenomena sheds new light on them The sort of issues that this perspective opens to exploration include Of what is this complex we call a social norm composed of How do new social norms emerge and what kind of circumstances might facilitate such an appearance How context specific are the norms and patterns of normative behaviour that arise How do the cognitive and the social aspects of norms interact over time How do expectations beliefs and individual rationality interact with social norm complexes to effect behaviour How does our social embeddedness relate to social constraint upon behaviour How might the socio cognitive complexes that we call norms be usefully researched
