Social Security Systems In Latin America:

Social Security Systems in Latin America Francisco E. Barreto de Oliveira, 1994 But Latin America now faces economic and social challenges that are forcing policymakers to find ways to reform social security. Insufficient funding and a lack of incentive to improve quality and efficiency have compromised many programs and today they often do not reach those who most urgently need them. Large deficits, low contribution rates, widespread tax evasion and increasing insolvency exacerbate the problem. Transformation of Social Security Katharina Müller, Andreas Rydl, Hans-Jürgen

Wagener, 2012-12-06 This collection of papers focuses on the recent pension reform experiences in Central Eastern Europe while starting from a broader theoretical and empirical context. It provides evidence for the political feasibility of radical pension reform considered unlikely in the West. The approach is both multi-disciplinary and cross-regional. The book contains papers by economists, political scientists, and sociologists. The authors come from Germany, Poland, Hungary, the Czech Republic, and the US. The volume consists of four parts. First, general questions of transformation and social security in post-1989 Central Eastern Europe are addressed, followed by an introduction into issues and role models in the international pension reform debate. Then three Central European country cases are presented, analysing institutional legacies, recent reform measures, and relevant political actors. A comparative section on Central Eastern European pension reforms concludes this book.

The Role of Social Security in Economic Development Everett Malcolm Kassalow, 1968 Latin American Social Policy Developments in the Twenty-First Century Natália Sátiro, Eloísa del Pino, Carmen Midaglia, 2021-02-12 This book explores the scope of reforms and changes in the social protection systems in Latin America that have started at the beginning of the 21st century. It describes how and to what extent changes in social protection systems and social policies have occurred in the region in recent decades. Taking a comparative approach, the volume identifies the triggers for the transformations and how such pressures are received by the welfare regime or a specific policy sector to finally yield a given type of reform. The analysis is characterized by the presence of certain factors that explain the development of social protection systems in Latin America such as economic growth, the consolidation of democratic political regimes, and the region's Left Turns. The book also examines to what extent common challenges and processes induced by international institutions have led to convergence among countries or welfare regimes or whether each maintains its own identity.

Social Insurance, Informality, and Labour Markets Markus Frölich, David Scott Kaplan, Carmen Pagés, Jamele Rigolini, David Robalino, 2014 This book reviews labor market and tax policies to improve social protection policies in middle-income countries, mostly Latin America and Asia. It reviews existing labor market distortions in these countries and analyzes various policy options to help reduce distorted incentives. Social Security Issues in Developing Countries International Monetary Fund, 1988-02-22 The paper surveys the major economic, financial, and administrative issues that confront social security systems in Latin America. The larger systems have contributed substantially to public sector financial disequilibria.

Expenditures of the younger systems with more limited coverage could increase dramatically as the pension plan matures life expectancy increases and coverage is broadened but the narrow revenue base will force a tradeoff between broader coverage and the generosity of benefits Most plans are pay as you go and the case for full or partial funding is not found to be compelling The inflationary environment can have a substantial effect on the financial balance even under full indexation

Social Protection in Developing Countries Katja Bender, Markus Kaltenborn, Christian Pfleiderer, 2013-09-02 Providing universal access to social protection and health systems for all members of society including the poor and vulnerable is increasingly considered crucial to international development debates This is the first book to explore from an interdisciplinary and global perspective the reforms of social protection systems introduced in recent years by many governments of low and middle income countries Although a growing body of literature has been concerned with the design and impact of social protection less attention has been directed towards analyzing and explaining these reform processes themselves Through case studies of African Asian and Latin American countries this book examines the global phenomenon of recent social protection reforms in low and middle income areas and how it differs across countries both in terms of scope and speed of institutional change Exploring the major domestic and international factors affecting the political feasibility of social protection reform the book outlines the successes and failures of recent reform initiatives This invaluable book combines contributions from both academics and practitioner experts to give students researchers and practitioners in the fields of social security economics law and political science an in depth understanding of political reform processes in developing countries

Social Security in Latin America William Paul McGreevey, 1990 This study reviews the findings of a number of background papers on social security in Latin America sector work and a series of three meetings of experts that explored the major issues facing social security institutions In Latin America social security institutes have been competently managed for the most part and have a proven record of successfully delivering social services to their members The central theme of this report is the great and largely untapped potential of social security institutions to relieve poverty in Latin America By taking advantage of the positive characteristics of these institutions and repairing at least some of the efficiency problems countries could achieve an enhanced level of income security for the aged better coverage of basic health services and wider protection from economic disasters for the whole population A wider revenue base would accommodate an increase in coverage of the population if combined with a prudently designed benefit package There is ample evidence from countries in the region that have experimented with such reforms that they can be made and that they are desirable and feasible on economic grounds Political feasibility is more difficult to assess but can be enhanced by well informed carefully
