Political Sociology of Adult Education Carlos Alberto Torres, 2013-09-03 Critical Theorist Carlos Alberto Torres offers a political sociology of adult learning and education based on Critical Social Theory and the always inspiring work of Paulo Freire Empirically grounded and theoretically sophisticated this new book follows the footsteps of his classic book published in the early nineties *The Politics of Nonformal Education in Latin America* Torres book offers comparative and international sociological analyses of adult learning and education an area in which there is an obsession with practice and an aversion to theory with some notable and laudable exceptions but which has the potential to provide avenues for social justice education in ways that no other systems and policies can This book revitalizes social theory in education and provides ample evidence of the power of adult learning and education examining a variety of policy documents connected with the various adult education congresses promoted by the UNESCO which are thoroughly scrutinized for what they bring to or omit from the policy agenda In the context of new developments in adult learning and education particularly the impact of multiple globalizations neoliberalism and the new role of international organizations in reconceptualizing lifelong learning new evidence based research new narratives and the vibrancy of social movements striving for a new and possible world it is clear that new theoretical designs were needed making this is a must read book

Autobiography Edward Shils, 2017-07-05 Edward Shils was one of the giants of sociological theory in the period after World War II. In this autobiography written three years before his death in 1995, Shils reflects on the remarkable range of his life's work and activities, including founding and editing the journal *Minerva*, being a central figure in the Congress of Cultural Freedom, serving as a founding member of the editorial board of *The Bulletin of Atomic Scientists*, and being a member of the International Council on the Future of the University. Shils recognizes that a unity of concern runs through his many theoretical writings and activities. Early in his life, the concern was expressed as understanding the character of consensus. During the last fifteen years of his life, he refined his understanding of consensus through investigation of the nature of collective self-consciousness. That concern was the structure and character of the moral order of a society and, in particular, liberal democratic society. Accompanying the autobiography are two unpublished essays: *Society* and *Collective Self-Consciousness*, and *Collective Self-Consciousness and Rational Choice*, two areas of intellectual concern discussed in the autobiography. The book contains a fascinating discussion of many of the people Shils knew throughout his illustrious career: Robert Park, Louis Wirth, Talcott Parsons, Karl Mannheim, Michael Polanyi, Audrey Richards, Karl Popper, Robert Merton, and many others. They represent Shils' final formulations on the character of society and its moral order. As such, it is a most important contribution both to the history of the social sciences in the twentieth century and to sociological theory.

School & Society James McKeen Cattell, Raymond Walters, 1942 *Progress*, 1900

English Socialism Henry Travis, 1880 **Publishers' circular and booksellers' record**, 1882 **Societal Dynamics** Frederick Betz, 2011-11-25 At both a micro information level and a macro societal level, the concepts of knowledge and wisdom are complementary in both decisions and in social structures and institutions. At the decision level, knowledge is concerned with how to make a proper choice of means where best is measured as the efficiency toward achieving an end. Wisdom is concerned with how to make a proper choice of ends that attain best values. At a societal level, knowledge is managed through science, technology, and innovation. And while science, technology, and innovation are society's way to create new means with high efficiencies, they reveal nothing about values. Technology can be used for good or for evil to make the world into a garden or to destroy all life. It is societal wisdom which should influence the choice of proper ends: ends to make the world a garden. How can society make progress in wisdom as well as knowledge? Historically, the disciplines of the physical sciences and biology have provided scientific foundations for societal knowledge. But the social science disciplines of sociology, economics, and political science have not provided a similar scientific foundation for societal wisdom. To redress this gap, Frederick Betz examines several cases in recent history that display a fundamental paradox between scientific technological achievement with devastating social effects, i.e., historical events of ideological dictatorships in Russia, Germany, China, and Yugoslavia. He builds a new framework for applying social science perspectives to explain societal histories and social theory. Emerging from this methodological and empirical investigation is a general topological theory of societal dynamics. This

theory and methodology can be used to integrate history and social science toward establishing grounded principles of societal wisdom

Knowledge Marian Adolf, Nico Stehr, 2014-05-29 Almost everything we do is based on our knowledge of the world around us how we dress in the morning how we go about our work how we interact with other people all these things rest on our understanding of how we know life Knowledge might be seen as the most central as well as the most under researched trait of social life we mainly think of knowledge as either technical scientific knowledge or formal as bestowed by academic education The things that we know are obscured in our everyday routines not revealing their true status as known until critical moments demand it This book establishes a fundamentally social understanding of knowledge Knowledge is re embedded into the discussion of how we as individuals and groups and as a modern society produce and reproduce knowledge as the foundation of our lives Knowledge is approached as a societal phenomenon as we uncover the ingredients and settings in which knowledge is produced and put to use
