**An Introduction to Sociolinguistics** Ronald Wardhaugh, Janet M. Fuller, 2014-10-24  
Thoroughly updated and revised, *An Introduction to Sociolinguistics* 7th Edition presents a comprehensive and fully updated introduction to the study of the relationship between language and society. Building on Ronald Wardhaugh's classic text, co-author Janet Fuller has updated this seventh edition throughout with new discussions exploring language and communities, language and interaction, and sociolinguistic variation, as well as incorporating numerous new exercises and research ideas for today's students. Taking account of new research from the field, the book explores exciting new perspectives drawn from linguistic anthropology and includes new chapters on pragmatics, discourse analysis, and sociolinguistics and education. With an emphasis on using examples from languages and cultures around the world, chapters address topics including social and regional dialects, multilingualism, discourse, and pragmatics, variation, language in education, and language policy and planning. A new companion website including a wealth of additional online material, as well as a glossary and a variety of new exercises and examples, helps further illuminate the ideas presented in the text. *An Introduction to Sociolinguistics* 7th Edition continues to be the most indispensable and accessible introduction to the field of sociolinguistics for students in applied and theoretical linguistics, education, and anthropology.

This is a two-volume collection of original research papers designed to reflect the breadth and depth of the impact that William Labov has had on linguistic science. Four areas of Labovian linguistics are addressed. First is the study of variation and change; the papers in sections I and II of the first volume take this as their central theme, with a focus on either the social context and uses of language I or on the internal linguistic dynamics of variation and change II. The study of African American English and other language varieties in the Americas spoken by people of African descent and influenced by their linguistic heritage is the subject of the papers in section III of the first volume. The third theme is the study of discourse; the papers in section I of the second volume develop themes in Labovian linguistics that go back to Labov's work on narrative, descriptive, and therapeutic discourse. Fourth is the emphasis on language use—the search for discursive
