### The Social Body

During the medieval period, society distinguished its people according to their function. Thus, one could be a part of the clergy, a noble, or a worker. Each group had its privileges and duties. At first, the higher titles were hereditary. However, with time, money became more powerful than inheritance. Some individuals agreed to sell noble titles to commoners to gain more wealth. Rich and powerful merchants and judges were allowed to become parts of noble families, while female commoners were given an opportunity to marry into nobility (Wiesner-Hanks 282). Thus, the race to the top began among lower-level people. Having a title meant receiving various opportunities, freeing oneself from taxation, and gaining some actual power over others. While some bought their titles, others tried to earn them by serving in courts.

Over time, the percentage of hereditary nobility lessened more and more, while the classes mixed. This intermixture prompted many people to separate themselves from others. Social classes dressed according to their position, noblemen started to build houses that allowed them to have some privacy from servants and family members. Thus, many tried to honor their status and made it so that refusing to conform to one's class distinction was seen as a sign of rebellion.

### The Writing Body

Personal documents became one of the sources of information not just for historians but for people of that period as well. As can be seen in the diary's entries, Pepys tried to write down every detail, documenting his dinners, travels, and work (Wiesner-Hanks 291). It is interesting that these everyday activities give one

George H Mead 1863 1931 is a central founding figure of modern sociology comparable to Karl Marx and Max Weber Mead's early work prior to his posthumous publications that appeared after 1932 is believed to be a series of articles contemporary scholarship defines as disconnected A previously unknown never published set of galley proofs for a book of essays by Mead written between 1892 and 1910 unites these articles into a logical perspective Essays in Social Psychology Mead's first book clearly locates him within a significantly different tradition and network than documented in his posthumous volumes The discovery of this work is a major scholarly event Instead of being abstract and unemotional as some scholars argue Mead's early scholarship focuses on the significance of emotions instincts and childhood as well as political issues underlying political problems in Chicago During these early years he was involved with the emerging Laboratory Schools at the University of Chicago which was then the center of progressive education These early topics interpretations and scholarly networks are dramatically different in these writings from those of Mead as a mature scholar They demonstrate that he was clearly making a transition from psychology to social psychology at a time when the latter was in its infancy Mary Jo Deegan a world renowned Meadian scholar has comprehensively edited this volume footnoting now obscure references and authors Her introduction explains how this previously lost manuscript affects contemporary Meadian scholarship and how it reflects the city and times in which he lived Unlike the posthumous volumes assembled from lecture notes Essays in Social Psychology is the only book actually written by Mead and challenges most current scholarship on him The selections are highly readable surprisingly timely yet historically significant Psychologists sociologists and educators will find it immensely important      **Essays on Sociology and Social Psychology** Karl Mannheim, 1959      **Curious Minds** Hellen Adom, 2009
