Orum, John G. Dale, 2009 The substantially revised and updated new fifth edition of this comprehensive text shows the broad social bases of politics and identifies how politics and actions by government can influence the fate of nations and their citizens The text provides insight into recent political sociological theories and helps students make sense of the many major social and political changes taking place in the world With a focus on the economy and politics states and societies civil society and politics basic forms of political rule power and equality in modern America political parties and citizen participation this text is the perfect foundation for undergraduate courses in political sociology      *Environment, Inc* Christopher John Bosso, 2005 To understand the environmental movement is to understand environmental organizations And no one better understands this than Bosso His book is both important and timely Jeffrey M Berry author of *The New Liberalism* *The Rising Power of Citizen Groups* A must read for anyone interested in the future of our environment Frank R Baumgartner coauthor of *Basic Interests* *The Importance of Groups in Politics and in Political Science* An important engaging and well written book that's ideal for courses in environmental politics Robert J Duffy author of *The Green Agenda in American Politics* *New Strategies for the Twenty First Century* A masterful study that fills a critical void in the field Michael E Kraft author of *Environmental Policy and Politics* Publisher      **Whose Welfare?** Steven Michael Teles, 1996 Few American social programs have been more unpopular controversial or costly than Aid to Families with Dependent Children AFDC Its budget now in the tens of billions of dollars has become a prominent target for welfare reformers and outraged citizens Indeed if public opinion ruled AFDC would be discarded entirely and replaced with employment Yet it persists Steven Teles's provocative study reveals why and tells us what we should do about it Teles argues that over the last thirty years political debate on AFDC has been dominated by an impasse created by what he calls ideological dissensus an enduring conflict between opposing cultural elites that have largely disregarded public opinion Thus he contends one must examine the origins and persistence of elite conflict in order to fully comprehend AFDC's immunity to the reform it truly needs the kind that unites the elements of order equality and individualism central to the American creed One of the first studies to analyze AFDC from a New Democrat position Whose

**The Global Compact, Corporate Social Responsibility and Textile and Garment Companies in the Philippines** Patrick Bolte, 2005-06-18 Diploma Thesis from the year 2004 in the subject Politics Topic Globalization Political Economics grade 1 3 Free University of Berlin Otto Suhr Institut f r

Politikwissenschaft language English abstract Over the first four years of its existence the Global Compact has made significant progress in terms of outputs but is threatened by its participants poor performance in rule compliance It has managed to secure small but reasonable funding and improved in the fields of guidance to participants inclusiveness and transparency It has proved to be adaptable to challenges as the introduction of the integrity measures and the addition of a tenth principle on anti corruption indicate However the lack of any enforcement of its rules that persisted until June 2004 appears to have been a model deficiency Up until the introduction of the integrity measures in that month the voluntary nature of Kofi Annan s initiative seems to have been over stretched as poor outcomes suggest While it has gained hundreds of new participants and now consists of nearly 1 700 most of these participants failed to fulfil their obligations of 1 integrating the principles into business operations 2 publicly advocating the Compact and 3 annually reporting on progress At least 1015 participants did not submit the required communication on progress COP Although this paper recognises the achievements of some participants as well as indirect outcomes amongst participants such as strengthening champions of reform within companies these successes do not make up for the huge reporting gap Conceivably all participants that did not submit COPs might have acted upon the principles nonetheless but even were this so in all cases the reporting gap posed at the very least a threat to the initiative s transparency and integrity However it is more likely that the reporting gap represents an actual implementation gap a gap that poses a much greater danger to the Global Compact s credibility and long term viability The Philippine Global Compact network was established in September 2001 its 137 members make it the third largest of the 44 networks after France and Spain Its dynamics reveal some of the root causes behind the participants poor performance in reporting The network s inception was spearheaded by the Employers Confederation of the Philippines ECOP and the International Labour Organisation ILO the initiative soon gained the support of the Philippine Chamber of Commerce and Industry PCCI Philippine Business for Social Progress PBSP and the United Nations Development Programme

UNDP      **Changing Urban Education** Clarence Nathan Stone, 1998 With critical issues like desegregation and funding facing our schools dissatisfaction with public education has reached a new high Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching Though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action This book tells why Changing Urban Education confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts Edited by one of the nation's leading urban scholars it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities Much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education The contributors show how urban political contexts vary widely with factors like racial composition the role of the teachers union and relations between cities and surrounding metropolitan areas Presenting case studies of original field research in Baltimore Chicago Houston and six other urban areas they consider how resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for reform through the involvement of business and other community players By demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars It also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved Changing Urban Education makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix While its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future      *Defining Americans* Mary E. Stuckey, 2004 Ranging broadly from Andrew Jackson to Bill Clinton and George W Bush Stuckey demonstrates how presidents accomplish the dual enactment of inclusion and exclusion through their rhetorical and political choices Our early leaders were preoccupied with balancing the growing nation later presidents were concerned with the nature and definitions of citizenship By examining the political speeches of presidents exemplifying distinctly different circumstances she presents a series of snapshots which when taken together reveal both the continuity and the changes in our national self understanding      **Black Social Capital** Marion Orr, 1999 Deindustrialization white flight and inner city poverty have spelled trouble for Baltimore schools Marion Orr now examines why school reform has been difficult to achieve there revealing the struggles of civic leaders and the limitations placed on Baltimore's African American community as each has tried to rescue a failing school system Examining the interplay between government and society Orr presents the first systematic analysis of social capital both within the African American community black social capital and outside it where social capital crosses racial lines Orr shows that while

black social capital may have created solidarity against white domination in Baltimore it hampered African American leaders capacity to enlist the cooperation from white corporate elites and suburban residents needed for school reform Orr examines social capital at the neighborhood level in elite level interactions and in intergovernmental relations to argue that black social capital doesn't necessarily translate into the kind of intergroup coalition needed to bring about school reform He also includes an extensive historical survey of the black community showing how distrust engendered by past black experiences has hampered the formation of significant intergroup social capital The book features case studies of school reform activity including the first analysis of the politics surrounding Baltimore's decision to hire a private for profit firm to operate nine of its public schools These cases illuminate the paradoxical aspects of black social capital in citywide school reform while offering critical perspectives on current debates about privatization site based management and other reform alternatives Orr's book challenges those who argue that social capital alone can solve fundamentally political problems by purely social means and questions the efficacy of either privatization or black community power to reform urban schools Black Social Capital offers a cogent conceptual synthesis of social capital theory and urban regime theory that demonstrates the importance of government politics and leadership in converting social capital into a resource that can be mobilized for effective social change

No Child Left Behind and the Transformation of Federal Education Policy, 1965-2005 Patrick J. McGuinn, 2006 Education is intimately connected to many of the most important and contentious questions confronting American society from race to jobs to taxes and the competitive pressures of the global economy have only enhanced its significance Elementary and secondary schooling has long been the province of state and local governments but when George W Bush signed into law the No Child Left Behind Act in 2002 it signaled an unprecedented expansion of the federal role in public education This book provides the first balanced in depth analysis of how No Child Left Behind NCLB became law Patrick McGuinn a political scientist with hands on experience in secondary education explains how this happened despite the country's long history of decentralized school governance and the longstanding opposition of both liberals and conservatives to an active reform oriented federal role in schools His book provides the essential political context for understanding NCLB the controversies surrounding its implementation and forthcoming debates over its reauthorization how the struggle to define the federal role in school reform took center stage in debates over the appropriate role of the government in promoting opportunity and social welfare He places the evolution of the federal role in schools within the context of broader institutional ideological and political changes that have swept the nation since the 1965 Elementary and Secondary Education Act chronicles the concerns raised by the 1983 report A Nation at Risk and shows how education became a major campaign issue for both parties in the 1990s McGuinn argues that the emergence of swing issues such as education can facilitate major policy change even as they influence the direction of wider political debates and partisan conflict McGuinn traces the Republican shift from seeking to eliminate the U S Department of Education to embracing

federal leadership in school reform then details the negotiations over NCLB the forces that shaped its final provisions and the ways in which the law constitutes a new federal education policy regime against which states have now begun to rebel and that only by understanding the unique dynamics of national education politics will reformers be able to craft a more effective national role in school reform      *Nuclear Politics in America* Robert J. Duffy, 1997 Duffy's work traces nuclear politics from the creation of a powerful subgovernment through the public lobby reforms of the late 1960s and early 1970s and the deregulatory backlash of the Reagan years He demonstrates that while policies did change in the 1970s they did not change as much as other accounts have suggested and that the industry continued to receive considerable federal support The book is particularly significant for extending the discussion of nuclear policy through the Bush and Clinton years including the controversy over waste disposal new licensing procedures enacted in the 1992 Amendments to the Atomic Energy Act and the effects of deregulation of electric utilities Amazon com viewed August 24 2020
