Corsino, 1982 Diplomacy, War, and Technology Since 1830 Maurice Pearton, 1984 No other book combines so much of modern military history with so rich an exploration of related factors in industry finance education and technology as well as statecraft Combining strands of history from all these areas Pearton makes an unusually complete and cogent case for the breakdown of traditional distinctions between the civil and the military and even between war and peace This is an excellent work of military and economic history Russell F Weigley author of *The American Way of War* Pearton s historical approach adds needed depth and perspective to many contemporary discussions of the arms problem This is an illuminating and incisive inquiry into a phenomenon of unquestioned importance International Affairs **The Future of the International Legal Order: The structure of the international environment** Cyril Edwin Black, Richard A. Shultz, Roy Godson, Ted Greenwood, 1993 The United States is grappling with a new security framework to replace the structure of the Cold War era American policymakers face a host of challenges including regional conflicts ethnic tensions and weapons proliferation that commanded little attention in the past And tomorrow is likely to bring new concerns barely on today s horizon Despite these changes the study of national security remains largely a creature of the Cold War The security studies discipline needs to be overhauled But how should it be revised so that tomorrow s citizens and experts are equipped to understand and help manage new challenges One option is to downgrade security studies and divert educational resources elsewhere Another is to redefine the subject to include the study of an all encompassing list of international problems The third choice is to retain basic definitions concepts and subjects while also making significant adjustments Security Studies for the 1990s addresses all three options This book is the first to reexamine security studies in the post Cold War era Scholars and directors from leading security studies programs representing a cross section of viewpoints on foreign affairs discuss what new material needs to be taught and which courses and concepts should be recast Each chapter provides an indepth review of a major security studies course proposing needed changes and a model syllabus Subjects include intelligence policy global

environmental problems the causes and termination of wars and collective security A chapter on the teaching of ethics a subject often neglected in the past is also featured BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved     The Encyclopædia Britannica ,1893     The Encyclopaedia Britanica ,1889     **Catalogue of the Library of the Boston Athenaeum. 1807-1871 ...: D-H** Boston Athenaeum,1876     **The Encyclopedia Britannica** Thomas Spencer Baynes,1878     Politics and the International System Robert L.
