

The Necessity of Experience

Introduction

Vera Kallenberg, Tomke König & Walter Erhart

Experience taken into the body, breathed-in,
so that reality is the completion of experience,
and poetry is what is produced.
And life is what is produced.

Muriel Rukeyser, *The Life of Poetry* [1949]

The title of this introduction, echoing Gerda Lerner's programmatic essay *The Necessity of History and the Professional Historian* (1982), has a twofold thrust: firstly, it emphasizes the existential quality of experience (*Erfahrung*). Every person's life is constituted by experiences, from the beginning of their existence to the end. Gender is one of the basic existential experiences that people have. Not only do we experience the world through our gender and being gendered, but experiences themselves are gendered and gendering. Secondly, this existential quality means that we must always approach experience as a phenomenon scientifically, or rather the phenomena addressed by experience, scientifically, conceptually, and methodologically as well as empirically. These complexes of understanding ask about the interrelationships between experience (*Erfahrung*) and experiencing (*Erleben*), experience and memory, testimony and memory, experience and narrative, experience and knowledge, experience and history and, last but not least, experience and knowledge. Furthermore, we need to explore the relationship between experience and action or agency, between experience and subjectivity, and between personal and collective experience. In short, investigating the complexity of experience means engaging with fundamental questions of scientific epistemology. These epistemological question horizons become even more challenging through the inclusion of gender.

This volume is the result of a research and reflection process that has taken place at Interdisciplinary Center for Gender Research (IZG), Bielefeld University, since 2021 in the context of the DFG-funded interdisciplinary Research Training Group *Experiencing Gender. Constitution and Transformation of Social Modes of Existence*. The aim of the chapters that make up this book is to theoretically reconceptualize gender

chapters introducing important contemporary accounts of causation It concludes with chapters on causation and agency
causal discovery and causal explanation Key questions explored in the book include What distinguishes correlation from
causation How are the causes of singular events related to more general patterns of cause and effect How are commonsense
scientific and legal conceptions of causation related Can certain occurrences be singled out as the main or principle causes of
some effect Is there a place in the world s causal structure for human agency and free will While introducing the major
philosophical debates about the nature of causation Causation The Basics emphasizes the uses and challenges of causal
reasoning as it occurs in the sciences engineering medicine and other areas of human life With a glossary of key terms and
