Strategic Data-planning Methodologies James Martin,1982 **Strategic Data Planning** Dale L. Goodhue,2015-08-05 Excerpt from Strategic Data Planning Lessons From the Field Many large organizations today are finding that even if they can access data from multiple functions the lack of logical data integration common data definitions and codes across information systems makes it difficult or impossible to answer cross functional or cross divisional questions This reduces their ability to take advantage of potential opportunities or respond to business problems Strategic Data Planning is one methodology which can address such problems within the general umbrella of information engineering Resting on the assumption that a relatively stable group of data entities lies at the center of an organization s information processing needs SDP is a formalized top down data centered planning approach that builds a model of the enterprise its functions and its underlying data as a basis for identifying and implementing an integrated set of information systems In spite of strong conceptual arguments for the value of the SDP approach and its use in many organizations empirical researchers have failed to find clear cut evidence of its general success This raises the question of whether the approach is universally appropriate If success is somewhat problematic are there lessons that can be drawn from actual organizational experience The purpose of this paper is to report the results of a series of case studies of SDP efforts to offer insights on the conditions under which SDP is most effective and to propose directions for future research About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Strategic Information Management** Robert D.
