The Quijos Chiefdoms Andrea M. Cuéllar,2009 Archaeological study of the emergence of the ethnohistorically documented Quijos chiefdoms in the eastern Ecuadorian Andes This research evaluates links between the emergence of centralized leadership and the organization of agricultural production The focus is on reconstructing the demographic history of 137 km<sup>2</sup> based on a full coverage systematic survey and on reconstructing patterns of food production and consumption based on analysis of pollen phytoliths and plant macroremains from the excavation of 31 tests at locations representing different environmental settings and settlement types The study proposes a sequence starting at about 600 B C with the first manifestations of a regional system of centralized authority appearing after about 500 A D Neither control of basic resources nor specialized craft production seem to have been important in the social and political dynamics of the emerging Quijos chiefdoms Complete text in English and Spanish      **Inter-American Yearbook on Human Rights / Anuario Interamericano de Derechos Humanos, Volume 20 (2004)** Inter-American Commission on Human Rights,2022-08-22
