Regulation (EU) No 608/2013 Concerning Customs Enforcement of Intellectual Property Rights Olivier

Vrins, 2018-01-31 Derived from the renowned multi volume International Encyclopaedia of Laws this monograph provides a survey and analysis of the rules concerning Regulation EU No 608 2013 Concerning Customs Enforcement of Intellectual Property Rights It covers every type of intellectual property right in depth copyright and neighbouring rights patents utility models trademarks trade names industrial designs plant variety protection chip protection trade secrets and confidential information Particular attention is paid throughout to recent developments and trends The analysis approaches each right in terms of its sources in law and in legislation and proceeds to such legal issues as subject matter of protection conditions of protection ownership transfer of rights licences scope of exclusive rights limitations exemptions duration of protection infringement available remedies and overlapping with other intellectual property rights The book provides a clear overview of intellectual property legislation and policy and at the same time offers practical guidance on which sound preliminary decisions may be based Lawyers representing parties with interests in Regulation EU No 608 2013 Concerning Customs Enforcement of Intellectual Property Rights will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative intellectual property law

Project Management Jack R. Meredith, Scott M. Shafer, Samuel J. Mantel, Jr., 2017-10-30 Projects continue to grow larger increasingly strategic and more complex with greater collaboration instant feedback specialization and an ever expanding list of stakeholders Now more than ever effective project management is critical for the success of any deliverable and the demand for qualified Project Managers has leapt into nearly all sectors Project Management provides a robust grounding in essentials of the field using a managerial approach to both fundamental concepts and real world practice Designed for business students this text follows the project life cycle from beginning to end to demonstrate what successful project management looks like on the ground Expert discussion details specific techniques and applications while guiding students through the diverse skill set required to select initiate execute and evaluate today's projects Insightful coverage of change management provides clear guidance on handling the organizational interpersonal economic and technical glitches that can derail any project while in depth cases and real world examples illustrate essential concepts in action

Enterprise and Social Rights Adalberto Perulli, Tiziano Treu, 2017-06-15 Globalization has led to growing labour fragmentation and widening of gaps in social protection Although the enterprise is increasingly expected to be socially responsible in actuality extreme worker inequalities and social dumping have become ubiquitous worldwide This volume the first to focus attention on the theory of the firm as it reveals itself in today's world from a multidisciplinary perspective underscores the necessity to rebuild a new scientifically controlled paradigm that acknowledges and regulates the dimension of power in the functioning of the organization In their contributed essays nineteen renowned scholars in labour law and industrial relations rethink the firm its conception its value and its

regulation analysing such aspects as the following labour management relations issues that arise when companies go global but workers remain local the firm as a social construction the continuing necessity for collective bargaining concealment of the employment relationship under the guise of self employment concealment of the real employer behind figureheads and shell companies social welfare effects of outsourcing the company's interaction with the network of suppliers and with local education processes determining who actually carries responsibility towards workers overcoming companies drive to enter the global market in response to national regulation realizing the notion of duty of care mechanisms of participation of workers in the management of the enterprise and the persistent limitations that women face in the workplace even when worker participation is advocated With attention to innovative developments in Germany Italy Japan and other countries analyses include case studies of specific companies as well as case law in particular the European Court of Justice's jurisprudence in matters of collective dismissals seconded workers and public contracts In their head on tackling of the fragmentation and blurring of social responsibility in enterprise organization these important essays propose a view of the enterprise as a factor in a new constitutionalisation of labour that shifts employment protection from single legal entities to the network's economic activity thus realigning the legal boundaries of the enterprise with its economic reality As a compelling investigation of how a satisfactory implementation of labour standards in the fragmented enterprise can be guaranteed this book will be studied by entrepreneurs managers consultants corporate lawyers judges human rights experts and trade unionists and will be welcomed by academics and researchers in industrial relations and labour law

The Politics of Arctic Sovereignty Jessica Shadian, 2014-01-10 Interest in Arctic politics is on the rise While recent accounts of the topic place much emphasis on climate change or a new geopolitics of the region the history of the Inuit Circumpolar Council ICC and Arctic politics reaches back much further in time Drawing out the complex relationship between domestic Arctic international and transnational Inuit politics this book is the first in depth account of the political history of the ICC It recognises the politics of Inuit and the Arctic as longstanding and intricate elements of international relations Beginning with European exploration of the region and concluding with recent debates over ownership of the Arctic the book unfolds the history of a polity that has overcome colonization and attempted assimilation to emerge as a political actor which has influenced both Arctic and global governance This book will be of strong interest to students and scholars of Arctic politics indigenous affairs IR theory and environmental politics

European Agencies and Risk Governance in EU Financial Market Law Paul Weismann, 2016-05-20 The phenomenon of agencification describes the EU legislator's increasing establishment of European agencies to fulfil tasks in a variety of EU policies The creation of these decentralised administrative entities raises a number of questions for example on the limits to such delegation of powers on the agencies institutional development and possible classification and on the role of comitology committees as an institutional alternative This book examines the EU's agencification with regard to these questions on the basis of and with reference to which the focus is laid on the European

agencies operating in the field of financial market risk governance This analysis not only encompasses the three European Financial Market Supervisory Authorities the ESAs but also takes into account the institutional change brought about by the Banking Union more specifically the Single Supervisory Mechanism SSM and the Single Resolution Mechanism SRM While the SRM sets in place a new European agency the Single Resolution Board SRB the SSM establishes and empowers a new body within the organisation of the European Central Bank ECB the Supervisory Board By exploring the organisation the tasks and the powers of these actors in financial market regulation and supervision the book points at the current peak of the institutional development of European agencies and assesses organisation and unprecedented powers with a view to their compliance with EU law in particular the Treaties and the respective case law of the European courts As an evaluation of various aspects of the progressing centralisation of regulatory power on the EU level which is exercised by an increasingly decentralised administrative apparatus this book will be of great interest and use to students and scholars of EU law financial law and regulation and European politics

therapy management characteristics and answers to key questions the MTM practice model and training survey and the Medicare Part D MTM program standardized format **Personnel Management Abstracts** ,1971 **Landpower in the Long War** Jason W. Warren,2019-06-14 War and landpower's role in the twenty first century is not just about military organizations tactics operations and technology it is also about strategy policy and social and political contexts After fourteen years of war in the Middle East with dubious results a diminished national reputation and a continuing drawdown of troops with perhaps a future force increase proposed by the Trump administration the role of landpower in US grand strategy will continue to evolve with changing geopolitical situations **Landpower in the Long War Projecting Force After 9 11** edited by Jason W Warren is the first holistic academic analysis of American strategic landpower Divided into thematic sections this study presents a comprehensive approach to a critical aspect of US foreign policy as the threat or ability to use force underpins diplomacy The text begins with more traditional issues such as strategy and civilian military relations and works its way to more contemporary topics such as how socio cultural considerations effect the landpower force It also includes a synopsis of the suppressed Iraq report from one of the now retired leaders of that effort The contributors made up of an interdisciplinary team of political scientists historians and military practitioners demonstrate that the conceptualization of landpower must move beyond the limited operational definition offered by Army doctrine in order to encompass social changes trauma the rule of law acquisition of needed equipment civil military relationships and bureaucratic decision making and argue that landpower should be a useful concept for warfighters and government agencies **Index of Bureau of Land Management Instruction Memos and Information Bulletins** W. Frank Meek,1986 **Global Technology and Legal Theory** Guilherme Cintra Guimarães,2019-06-05 The rise and spread of the Internet has accelerated the global flows of money technology and information that are increasingly perceived as a challenge to the traditional regulatory powers of nation states and the effectiveness of their constitutions The acceleration of these flows poses new legal and political problems to their regulation and control as shown by recent conflicts between Google and the European Union EU This book investigates the transnational constitutional dimension of recent conflicts between Google and the EU in the areas of competition taxation and human rights More than a simple case study it explores how the new conflicts originating from the worldwide expansion of the Internet economy are being dealt with by the institutional mechanisms available at the European level The analysis of these conflicts exposes the tensions and contradictions between on the one hand legal and political systems that are limited by territory and on the other hand the inherently global functioning of the Internet The EU's promising initiatives to extend the protection of privacy in cyberspace set the stage for a broader dialogue on constitutional problems related to the enforcement of fundamental rights and the legitimate exercise of power that are common to different legal orders of world society Nevertheless the different ways of dealing with the competition and fiscal aspects of the conflicts with Google also indicate the same limits that are generally attributed to the very project of European integration

showing that the constitutionalization of the economy tends to outpace the constitutionalization of politics Providing a detailed account of the unfolding of these conflicts and their wider consequences to the future of the Internet this book will appeal to scholars working in EU law international law and constitutional law as well as those in the fields of political science and sociology
