Globalization and Transnational Capitalism Xing Li,Jizhen Li,Gorm Winther,2009 This volume examines how globalization and transnational capitalism have reshaped the terrain and parameters of social economic and political relations both at the national and the global levels and how the relations of domination and subordination are reproduced in new forms beyond national borders It discusses the essential question on whether the resilient hegemony of transnational capitalism can be possibly reproduced containing alternative systems of organization The book can be heuristically summarized by the Chinese words for crisis which is made up of two syllables Wei and Ji representing danger and opportunity respectively It means that there is a crisis there is an element of danger and that there is opportunity Consequently while it is important to understand the embedded limits of capitalism it is equally important to continue the effort to search for alternative opportunities
