## **Strategic Air Power In Desert Storm:**

*Strategic Air Power in Desert Storm* John Andreas Olsen, 2013-11-05 In response to the Iraqi invasion of Kuwait on the second of August 1990 a small group of air power advocates in the Pentagon proposed a strategic air campaign Operation Desert Storm designed to drive the Iraqi army from Kuwait by a sustained effort against the major sources of Iraqi national power John Andreas Olsen provides a coherent and comprehensive examination of the origins evolution and implementation of this campaign His findings derive from official military and political documentation interviews with United States Air Force officers who were closely involved with the planning of the campaign and Iraqis with detailed knowledge and experience of the inner workings of the Iraqi regime

**Strategic Air Power in Desert Storm** Richard G. Davis, Air Force History and Museums Program (U.S.), 1995\* Storm Over Iraq Richard Hallion, 2015-05-26 An incisive account of the Persian Gulf War Storm Over Iraq shows how the success of Operation Desert Storm was the product of two decades of profound changes in the American approach to defense military doctrine and combat operations The first detailed analysis of why the Gulf War could be fought the way it was the book examines the planning and preparation for war Richard P Hallion argues that the ascendancy of precision air power in warfare which fulfilled the promise that air power had held for more than seventy five years reflects the revolutionary adaptation of a war strategy that targets things rather than people allowing one to control an opposing nation without destroying it

*Strategic air power in Desert Storm* John Andreas Olsen, 2003 **Conventional Military Strategy in the Third Nuclear Age** Joy Mitra, 2023-02-28 This volume delves into the way conventional deterrence operates between nuclear armed states in the third nuclear age Unlike the first and second ages the advent of this new age has witnessed greater strain on the principles of mutual vulnerability and survivability that may result in increased risks of advertent or inadvertent escalation and horizontal nuclear proliferation The book looks at the sum of three key simultaneous developments in the third nuclear age that merit attention These include the emergence of asymmetric strategies the introduction of unmanned platforms and the expansion of nuclear arsenals The volume discusses how these concurrent developments might shape the practice of conventional deterrence and provides useful insights into conventional military dynamics not just among the current nuclear dyads but also ones that may emerge in future It seeks answers to several key issues in state security not limited to What purpose and scope does the conventional military instrument have in a state s overall military strategy versus other nuclear armed states If mutual vulnerability and deterrence are the frameworks why did the prospect of escalation appear in the first place What are the trends political doctrinal or technological that augment or diminish conventional and nuclear interface With insights on military crises that have witnessed participation from nuclear armed states like the United States Russia China Pakistan and India this book will especially be of interest to scholars and researchers working in the areas of security and deterrence studies defence and strategic studies peace and conflict studies and foreign policy It will also appeal to policymakers career bureaucrats security and defense practitioners

and professionals working with think tanks and embassies      **On target : organizing and executing the strategic air campaign against Iraq** ,      *Strategic Review* ,1998 dedicated to the advancement and understanding of those principles and practices military and political which serve the vital security interests of the United States      **Parameters** ,1997

**Airpower Advantage** Diane Therese Putney,2004 American air power is a dominant force in today s world Its ascendancy evolving in the half century since the end of World War II became evident during the first Gulf War Although a great deal has been written about military operations in Desert Shield and Desert Storm this deeply researched volume by Dr Diane Putney probes the little known story of how the Gulf War air campaign plan came to fruition Based on archival documentation and interviews with USAF planners this work takes the reader into the planning cells where the difficult work of building an air campaign plan was accomplished on an around the clock basis The tension among air planners is palpable as Dr Putney traces the incremental progress and friction along the way The author places the complexities of the planning process within the context of coalition objectives All the major players are here President George H W Bush General H Norman Schwarzkopf General Colin Powell General Chuck Horner and Secretary of Defense Richard Cheney The air planning process generated much debate and friction but resulted in great success a 43 day conflict with minimum casualties Dr Putney s rendering of this behind the scenes evolution of the planning process in its complexity and even suspense provides a fascinating window into how wars are planned and fought today and what might be the implications for the future C R Andereggs Director of Air Force History      *Air Power History* ,2005      Victory from Above Jerome V. Martin,2002-07 The US led coalition response to Iraq s invasion of Kuwait was a highly successful application of modern military forces especially air power Both the buildup and the combat operations provide significant food for thought for military analysis and a considerable source of insight for future commanders As with any military conflict this war should not be viewed as a model for the next war but rather as another contribution to the body of experience and knowledge that shapes the insights and perspectives of military professionals Some observers have contended that the performance of the coalition air forces in Operations Desert Shield and Desert Storm heralds the arrival of a new generation of warfare sometimes labeled hyperwar Others commenting on the experience note the merge of capabilities technology focused by tactics and strategic planning with the long standing promise of air power theory This study focuses on the latter perspective and the close relationship between the core elements of air power theory and the conduct of Operation Desert Shield and Operation Desert Storm Lt Col Jerome V Martin wrote this study as a primer on air power and a broad survey of the Gulf conflict for the cadets at the US Air Force Academy His summary of the essence of air power theory and its illustrated use against Iraq should help Air Force officers and others interested in air power to better understand the potential of modern aviation in a crisis situation and combat Robert M Johnston Colonel United States Air Force Director Airpower Research Institute      Thunder and Lightning Edward C. Mann,1995      *U.S. Naval Institute Proceedings* United States Naval Institute,1995      NATO's Gamble Dag

Henriksen,2007 The author reveals that from the outset the military leaders set to execute the campaign had no clear strategic guidance on what the operation was to achieve and he further argues that the airpower community's general focus on high intensity wars hampered them from developing strategies to fit the political complexities of the Kosovo crisis

BOOK JACKET Airpower Journal ,1999 **Shield and Sword** Edward J. Marolda,Robert John Schneller,1998 *The Journal of Military History* ,2003 **Heart of the Storm** Richard T. Reynolds,1995 Colonel Reynolds presents a firsthand account of the struggle to design and implement the air campaign that proved instrumental in defeating Iraq in the Gulf War Through documentary research and dialogue derived from interviews with key players such as Generals Dugan Russ Loh and Horner he traces the evolution of the air campaign plan known as Instant Thunder from its origins in the mind of Col John A Warden III to the decision by General Schwarzkopf to employ airpower as his weapon of choice against Saddam Hussein Heart of the Storm provides behind the scenes insights into how future decisions to use airpower will likely be made It is a companion volume to Mann's Thunder and Lightning Bombs, Cities, and Civilians Conrad C. Crane,1993 As the might and capabilities of American airpower have grown during the last 60 years so has the controversy about its use in the intentional and indiscriminate wartime bombardment of civilians In Bombs Cities and Civilians Conrad Crane maintains that for the most part American airmen in World War II remained committed to precision bombing doctrine Instead of attacking densely populated urban areas simply to erode civilian morale Army Air Forces adhered to a policy that emphasised targeting key industrial and military sites He demonstrates that while the British Germans and Japanese routinely conducted indiscriminate aerial bombardment of enemy cities American airmen consistently stayed with daylight raids against carefully selected targets especially in Europe Daytime precision missions were usually far more dangerous than night area attacks but such Army Air Forces tactics increased bombing efficiency and also reduced the risk of civilian casualties **Heart of the Storm** Richard T. Reynolds,, Richard TReynolds , USAF,2005-07-01 Airmen all over the world felt relief and exhilaration as the war in the Gulf reached its dramatic conclusion on 28 February 1991 Many nonairmen of course experienced those emotions as well but for a variety of different reasons Airmen long uneasy about the lingering inconclusiveness of past applications of their form of military power now had what they believed to be an example of air power decisiveness so indisputably successful as to close the case forever Within the United States Air Force among those who thought about the uses of air power there were two basic groups of airmen The first smaller and less influential held to the views of early air pioneers in their belief that air power was best applied in a comprehensive unitary way to achieve strategic results The second much more dominant had come to think of air power in its tactical applications as a supportive element of a larger surface land or maritime campaign Thinking in terms of strategic air campaigns members of the first group found their inclinations reinforced by Col John Warden's book The Air Campaign Planning for Combat published in 1988 Over the years the second group increasingly concentrated on refining specific mission capabilities close air support interdiction air refueling etc that

could be offered to a joint force commander for his allocation decisions Members of this group rarely thought in terms of comprehensive air campaigns to achieve strategic objectives and indeed generally equated the term strategic to Strategic Air Command's long range bomber force in delivery of nuclear weapons Both groups found agreement in their love of the airplane and their search for acceptance as equal partners with their older sister services In that regard airmen everywhere stepped forward in late February to receive the congratulations they felt were so richly deserved Put aside for the moment at least was the fact that a hot and often bitter debate had taken place within the Air Force on the eve of Operation Desert Storm over the very issue of the strategic air campaign and the question of whether air power would be used in that form Here was a story to be told a piece of history to be recorded Just how that story would be told was to my mind by no means clear In the end of course the Gulf War did in fact include a strategic air campaign and the very least that one could say about it was that by so thoroughly destroying the Iraqis capability to conduct warfare it permitted a relatively blood less war concluding ground operation by coalition army forces The most that one could say about the air campaign was that it in and of itself won the war At Air University AU where I was serving at the time as commander direct involvement in Desert Shield Storm was about as limited as in any part of the Air Force We had done some early macroanalyses of air campaign options in the Air Force Wargaming Center we had excused some students from their studies at Air Command and Staff College to act as observers in various headquarters involved in the war and like all commands we had sent support personnel to augment CENTAF forces in the desert Otherwise we were as detached as it was possible to be that is to say vitally interested but wholly without responsibility Our responsibility would begin when the guns fell silent Within that overall context and in the heady moment of selfcongratulation by airmen two thoughts occurred to me 1 the story of the Air Force's development of an air campaign would rapidly become hazy as human memories began to fail either willfully or through natural erosion and 2 air power's effect on the outcome of the war would become increasingly controversial as non Air Force institutions realized that their own resources would likely diminish if airmen's conclusions were accepted
