Alternative Concepts of God Andrei A. Buckareff, Yujin Nagasawa, 2016 The concept of God according to traditional Judeo Christian Islamic theism minimally includes the following theses i There is one God ii God is an omniscient omnipotent and morally perfect agent iii God is the creator ex nihilo of the universe and the sustainer of all that exists and iv God is an immaterial substance that is ontologically distinct from the universe Proponents of alternative concepts of God such as pantheism panentheism religious anti realism developmental theism and religious naturalism exclude at least one of these claims A number of prominent philosophers and scientists have expressed sympathy with alternative concepts of the divine However voices raised in defense of these concepts tend not to be taken seriously in contemporary analytic philosophy of religion This volume aims to shed light on alternative concepts of God and to thoroughly consider their merits and demerits The contributors are leading analytic philosophers of religion including critics of these views as well as sympathizers This is the first contemporary edited collection featuring the work of analytic philosophers of religion covering such a wide range of alternative concepts of God

Processing and Producing Head-final Structures Hiroko Yamashita, Yuki Hirose, Jerome L. Packard, 2010-11-05 This book is the first collection of studies on an important yet under investigated linguistic phenomenon the processing and production of head final syntactic structures Until now the remarkable progress made in the field of human sentence processing had been achieved largely by investigating head initial languages such as English The goal of the present volume is to deepen our understanding by examining head final languages and offering a comparison of those results to findings from head initial languages This book brings together cross linguistic investigations of languages

with prominent head final structures such as Basque Chinese German Japanese Korean and Hindi It will inform readers of linguistics with both theoretical and experimental backgrounds as it provides accounts of previous studies offers experimentally based theoretical discussions and includes experimental stimuli in the original languages *Handbook of Psychology, Experimental Psychology* Irving B. Weiner, Alice F. Healy, Robert W. Proctor, 2012-10-05 Psychology is of interest to academics from many fields as well as to the thousands of academic and clinical psychologists and general public who can't help but be interested in learning more about why humans think and behave as they do This award winning twelve volume reference covers every aspect of the ever fascinating discipline of psychology and represents the most current knowledge in the field This ten year revision now covers discoveries based in neuroscience clinical psychology's new interest in evidence based practice and mindfulness and new findings in social developmental and forensic psychology *The American State Reports* Abraham Clark Freeman, 1893 **Documents of the Assembly of the State of New York** New York (State).
