Textures Of Renaissance Knowledge:

Textures of Renaissance Knowledge Philippa Berry, Margaret Tudeau-Clayton, 2003 Table of contents **Textures of Renaissance Knowledge** Philippa Berry, Margaret Tudeau-Clayton, 2003 Table of contents Cultural Genealogy Raphael Falco, 2016-10-26 Cultural Genealogy explores the popularization in the Renaissance of the still pervasive myth that later cultures are the hereditary descendants of ancient or older cultures The core of this myth is the widespread belief that a numinous charismatic power can be passed down unchanged and in concrete forms from earlier eras Raphael Falco shows that such a process of descent is an impossible illusion in a knowledge based culture Anachronistic adoption of past values can only occur when these values are adapted and assimilated to the target culture Without such transcultural adaptation ancient values would appear as alien artifacts rather than as eternal truths Scholars have long acknowledged the Renaissance borrowings from classical antiquity but most studies of *translatio studii* or *translatio imperii* tacitly accept the early modern myth that there was a genuine translation of Greek and Roman cultural values from the ancient world to the modern But as Falco demonstrates this is patently not the case The mastering of ancient languages and the rediscovery of lost texts has masked the fact that surprisingly little of ancient religious ethical or political ideology was retained so little that it is crucial to ask why these myths of transcultural descent have not been recognized and interrogated Through examples ranging from Petrarch to Columbus Maffeo Vegio to the Habsburgs Falco shows how the new *techne* of systematic genealogy facilitated the process of remythicizing the ancient authorities utterly transforming Greek and Roman values and reforging them into the mold of contemporary needs Chiefly a study of intellectual culture Cultural Genealogy has ramifications reaching into all levels of society both early modern and later *Physical Education, Health, and Music*, 1997 **Texture in the Work of Ian Hacking** María Laura Martínez Rodríguez, 2021-01-19 This book offers a systematized overview of Ian Hacking's work It presents Hacking's oeuvre as a network made up of four interconnected key nodes styles of scientific thinking doing probability making up people and experimentation and scientific realism Its central claim is that Michel Foucault's influence is the underlying thread that runs across the Canadian philosopher's oeuvre Foucault's imprint on Hacking's work is usually mentioned in relation to styles of scientific reasoning and the human sciences This research shows that Foucault's influence can in fact be extended beyond these fields insofar the underlying interest to the whole corpus of Hacking's works namely the analysis of conditions of possibility is stimulated by the work of the French philosopher Displacing scientific realism as the central focus of Ian Hacking's oeuvre opens up a very different landscape showing behind the apparent dispersion of his works the far reaching interest that amalgamates them to reveal the historical and situated conditions of possibility for the emergence of scientific objects and concepts This book shows how Hacking's deployment concepts such as looping effect making up people and interactive kinds can complement Foucauldian analyses offering an overarching perspective that can provide a better explanation of the objects of the human sciences and their behaviors
