This handbook has a variety of attributes that make it a highly desirable desk reference for today's mental health practitioners in geriatrics and gerontology. Few stones have been left unturned in the 22 reader-friendly chapters that comprise the handbook. Not only are general treatment issues addressed in great detail but assessment procedures, the treatment of specialized psychological and behavioral problems, and even issues in effective collaboration with medical geriatricians are considered. The scope and breadth of clinical knowledge and wisdom found within the covers of this volume are certainly impressive. Lenard W. Kaye, Professor, Bryn Mawr College. The authors have succeeded in drawing on the expertise of a broad range of recognized authorities in clinical gerontology who have the capacity to communicate to the reader with considerable clarity both current information and best practice strategies of mental health intervention with older adults. Lenard W. Kaye, Professor, Bryn Mawr College. It would be difficult to find another reference source in clinical gerontological practice that is able to deal with the challenges of practice in this area with greater comprehensiveness and authority. The multidisciplinary perspective of the handbook ensures it being a valuable addition to the clinical practice collections of psychologists, social workers, nurses, gerontologists, and other allied health professionals. And once obtained, it should not gather dust given the currency and utility of the information. Lenard W. Kaye, Professor, Bryn Mawr College.
