Birth of a cell

# The Birth Of The Cell

**Katrin Zwirgmaier**

## **The Birth Of The Cell:**

*The Birth of the Cell* Henry Harris, 2000-01-01 Henry Harris here provides an account of how scientists came to understand that the bodies of all living things are composed of microscopic units that we now call cells. Harris turns to the primary literature, the original texts, scientific papers and correspondence of medical researchers involved in the formulation of the cell doctrine to reconstruct the events that enabled researchers to comprehend the nature and purpose of cells. Translating many of these documents into English for the first time, Harris uncovers a version of events quite different from that described in conventional science textbooks. Focusing on the scientific history of the genesis of the cell doctrine, the author also considers contemporary social and political contexts and shows how these influenced what experiments were undertaken and how the results were represented.

The Song of the Cell Siddhartha Mukherjee, 2022-10-30 From Pulitzer Prize winning and 1 New York Times bestselling author of *The Emperor of All Maladies* and *The Gene*, *The Song of the Cell* is the third book in this extraordinary writer's exploration of what it means to be human, rich with Siddhartha Mukherjee's revelatory and exhilarating stories of scientists, doctors, and all the patients whose lives may be saved by their work. In the late 1600s, a distinguished English polymath, Robert Hooke, and an eccentric Dutch cloth merchant, Antonie van Leeuwenhoek, look down their handmade microscopes. What they see introduces a radical concept that sweeps through biology and medicine, touching virtually every aspect of the two sciences and altering both forever. It is the fact that complex living organisms are assemblages of tiny self-contained self-regulating units. Our organs, our physiology, our selves, hearts, blood, brains are built from these compartments. Hooke christens them cells. The discovery of cells and the reframing of the human body as a cellular ecosystem announced the birth of a new kind of medicine based on the therapeutic manipulations of cells. A hip fracture, a cardiac arrest, Alzheimer's dementia, AIDS, pneumonia, lung cancer, kidney failure, arthritis, COVID, all could be viewed as the results of cells or systems of cells functioning abnormally. And all could be perceived as loci of cellular therapies. In *The Song of the Cell*, Mukherjee tells the story of how scientists discovered cells, began to understand them, and are now using that knowledge to create new humans. He seduces readers with writing so vivid, lucid, and suspenseful that complex science becomes thrilling. Told in six parts, laced with Mukherjee's own experience as a researcher, doctor, and prolific reader, *The Song of the Cell* is both panoramic and intimate, a masterpiece.
