## **The Blue Whale:**

Blue Whales John F. Prevost,1995-01-01 Describes the physical characteristics behavior and habitat of the largest animal on earth the blue whale    **The Blue Whale** Stanislao Nievio,2000 The story of a close encounter between a woman and a

whale told from the perspective of both protagonists A scientific project studying blue whales takes a strange turn when one of the whales and Miriam the team s statistician discover that they share a mystic telepathic communication    The Blue

Whales Kazue Mizumura,1971 Describes the oceanic existence of the blue whale the largest animal that ever lived    The Blue Whale Chris Reiter,2003 Discusses what blue whales are why they are endangered what their current status is and what

is being done to help them Includes Internet links to Web sites related to blue whales    The Blue Whale Yuliya

Barannikova, 1st,2020-09-30 This story aims to show the way of living of the biggest animal in the world the blue whale Blue

whales lead a lonely life spending most of the time on their own and rarely joining some other whales The blue whale in this story admires the sun and all the beauty of the ocean He faces danger and must protect himself The blue whale is curious of

other creatures such as people He even makes some short friendships with a boy But it never lasts too long as whales and a boy have quite different ways of living And time to separate comes Such a short friendship reminds the reader that the whale

is made to lead a lonely life Finally the whale must do his duty and give birth to other whales In real life the blue whales

never make a family for their whole life and babies are being raised by their moms So the story aims to stress it maybe

whales would love to live a family life he will even give birth to few whale babies through his life But he will never stay with

them for a long time He has to come back to his home as he is made to live a lonely life However he is the biggest animal in

the world lonely but beautiful and this beauty is seen in his movement splashing swimming swallowing and leading this

simple lie in the dark waters And that s what makes him so special so interesting so impressive and must be shown through

the illustrations    Wild Blue Dan Bortolotti,2008-10-14 The blue whale holds the title of largest creature that has ever lived

and it may also be the most mysterious The biggest blue whales can outweigh every player in Major League Baseball and the

National Hockey League combined Their mouths can gulp more than thirteen thousand gallons of seawater A newborn can be

over twenty feet long and gain nearly twenty tons in seven months about eight pounds per hour Blue whales emit more

powerful sounds than any other animal on earth though many of their vocalizations are beyond the range of human hearing

Yet nearly everything that we have learned about blue whales has come after humans almost wiped them out from the oceans

A century ago some three hundred thousand roamed the seas But in the first decades of the twentieth century humans

hunted and killed 99 9% of them Their numbers decimated the species seemed destined for extinction Only in recent years

has the number slowly begun to increase along with hope for the blue whale s future Equal parts history and science Wild

Blue is the first comprehensive portrait of the blue whale It draws upon new findings from scientists who have begun to
