**What's the Use of Race?** Ian Whitmarsh, David S. Jones, 2010-04-16 How race as a category reinforced by new discoveries in genetics is used as a basis for practice and policy in law science and medicine The post civil rights era perspective of many scientists and scholars was that race was nothing more than a social construction Recently however the relevance of race as a social legal and medical category has been reinvigorated by science especially by discoveries in genetics Although in 2000 the Human Genome Project reported that humans shared 99.9 percent of their genetic code scientists soon began to argue that the degree of variation was actually greater than this and that this variation maps naturally onto conventional categories of race In the context of this rejuvenated biology of race the contributors to What s the Use of Race Investigate whether race can be a category of analysis without reinforcing it as a basis for discrimination Can policies that aim to alleviate inequality inadvertently increase it by reifying race differences The essays focus on contemporary questions at the cutting edge of genetics and governance examining them from the perspectives of law science and medicine The book follows the use of race in three domains of governance ruling knowing and caring Contributors first examine the use of race and genetics in the courtroom law enforcement and scientific oversight then explore the ways that race becomes implicitly or explicitly part of the genomic science that attempts to address human

diversity and finally investigate how race is used to understand and act on inequities in health and disease Answering these questions is essential for setting policies for biology and citizenship in the twenty first century **The Biology of the Race Problem** Wesley George, 2013-07-28 This astonishing book written by a Professor of Histology and Embryology emeritus and former head of the Department of Anatomy University of North Carolina Medical School was commissioned by the Governor of Alabama 1962 in an attempt to scientifically establish if there was a biological basis to race The results of Professor George's research were dramatic race is a biological reality despite leftist race denial This superb overview provides an insight into physical differences which impact upon intelligence behaviour and environment Contents Some Authorities Cited Introduction I Are All Babies Approximately Uniform And Equal When They Are Born II The Mechanism Of Heredity III Are There Fundamental Differences Between The White And Negro Races A Non morphological Racial Differences B Intelligence Tests C Race and Crime IV Physical Bases For Intellectual And Behavioral Differences V Genetics Behavior And Breed Differences In Animals A The Findings of Stockard and Associates B Relation of Morphology to Behavior Traits in Different Breeds of Dogs C Physical and Behavioral Disharmonies D Corroboration by Others VI Inheritance Of Intelligence And Behavior In Man A The Genetics of Genius B The Genetics of Crime C The Genetics of Mental Abnormality D Other Witnesses to the Hereditary Basis for Intelligence and Behavior VII Are Racial Differences Hereditary A The Origin of Racial Differences VIII Should We Promote Racial Amalgamation A The Historical Record of the Negro Race B The Historical Accident Explanation C The Hot Climate Explanation D Heredity vs Environment in Negro History IX A Guide To Social Justice And National Greatness X The Influence Of Franz Boas **The Biology of the Race Problem** W. C. George, 2018-07-25 Commissioned by the Governor of Alabama in 1962 this seminal work on the reality of racial differences remains one of the most concise works on the topic Starting with an explanation of the workings of hereditary the author moves on to an in depth discussion of the fundamental and as he points out unchangeable racial differences between Europeans and Africans in particular Addressed in this volume are the standard topics of physical psychological and intellectual differences It then moves on to the important effects these differences have on society providing an explanation for the ongoing and disproportionately high non white crime rate which the author shows is rooted in an physical difference which creates different behavioral patterns It then discusses the influence of genetics on behavior and how this principle is used in the breeding of animals before showing how this is equally applicable to human genetics George then discusses the origin of racial differences and the dangers posed by racial integration before concluding with an overview of the historical record of the Negro race and destroying all the classical liberal explanations for its non achievements Finally the author proposes a just solution to the problem physical geographic separation which will be in the interests of all races Also contains an appendix detailing the lies and subversion spread by the Jewish anthropologist Franz Boas who started the environmental school of anthropology About the author Wesley Critz George 1888 1982 was a professor of histology and embryology at the
