Getsy, 2015-11-03 Original

and theoretically astute *Abstract Bodies* is the first book to apply the interdisciplinary field of transgender studies to the discipline of art history. It recasts debates around abstraction and figuration in 1960s art through a discussion of gender's mutability and multiplicity. In that decade, sculpture purged representation and figuration but continued to explore the human as an implicit reference. Even as the statue and the figure were left behind, artists and critics asked how the human and particularly gender and sexuality related to abstract sculptural objects that refused the human form. This book examines abstract sculpture in the 1960s that came to propose unconventional and open accounts of bodies, persons, and genders. Drawing on transgender and queer theory, David J. Getsy offers innovative and archivally rich new interpretations of artworks by and critical writing about four major artists: Dan Flavin (1933–1996), Nancy Grossman (b. 1940), John Chamberlain (1927–2011), and David Smith (1906–1965). *Abstract Bodies* makes a case for abstraction as a resource in reconsidering gender's multiple capacities and offers an ambitious contribution to this burgeoning interdisciplinary field.

*Key Concepts for the Fashion Industry* Andrew Reilly, 2014-08-28 *Key Concepts for the Fashion Industry* is the first concise and accessible overview of fashion theories for students on any fashion course. Providing an easy understanding of the core concepts from scarcity to conformity, this book offers clear practical examples and accessible case studies, making complex theory easy to digest. All fashion students need a basic understanding of how a style becomes a fashion and how this spreads or declines, whether they are studying fashion design, merchandising, or any other fashion course. Containing student-friendly features such as discussion questions, activities, and further reading, this book is essential reading for all students studying across all areas of fashion.
