The Diffusion Of Advanced Telecommunications In Developing Countries:

The Diffusion of Advanced Telecommunications in Developing Countries Cristiano Antonelli, Organisation for Economic Co-operation and Development. Development Centre, 1991 The Impact of Mobile Phones on Poverty and Inequality in Developing Countries Jeffrey James, 2015-12-23 This book investigates at both the micro and macroeconomic levels the impact of mobile phones on poverty and inequality in developing countries To gauge the effects of mobile phones on these aspects the author refers to the standard concept of technology adoption and also analyses the actual utilization of mobile phones as a means of communication and the degree to which they have supplanted fixed line phones Readers will learn why the substitution effect is stronger among poor than rich users and why the benefits of some mobile phone projects are confined to the local or village level while in other projects the gains can be felt throughout the economy as a whole

Globalization, Information Technology and Development J. James, 1999-02-24 Jeffrey James develops the insights of the often separate literatures on globalization and information technology and demonstrates their interdependence The central insight is that globalization is mainly a technological phenomenon driven by influences exerted on international trade and foreign investment by various forms of information technology Developing countries however are not sharing equally in the gains from globalization thus induced by the new technologies These gains tend to be concentrated among a narrow group of relatively advanced countries and moreover within some of those countries information technology appears to exacerbate existing income inequalities Technological Substitution in Asia Ewa Lechman, 2017-11-14 Over last few decades the world has witnessed the process of rapid diffusion of new information and communication technologies ICT that enforced remarkable changes and structural shifts going far beyond economic sphere of life ICT become fast available widespread and rapidly growing access to and use of ICT additionally enhances the process of technological substitution which consists in switching from the old to new technological solutions The on going digital revolution undeniably pervasively impacts and reshapes societies and economies hence deserves special attention and interest This book provides extensive evidence on information and communication technologies development diffusion patterns unveils specific network effects that enhance rapid spread of ICT and detect major macroeconomic determinants of this process across 36 Asian economies over the period 1980 2015 Moreover this research traces country specific patterns of the unique process We consider two types of technological substitution namely fixed to mobile type technological substitution process encompasses switching from fixed telephony old technology to mobile telephony new technology while the fixed to wireless type technological substitution switching from fixed narrowband and or broadband fixed Internet networks old technologies to wireless mainly broadband Internet networks new technologies Moreover this study empirically identifies the potential effect of selected macroeconomic factors which may potentially enhance dynamic spread of ICT **2009 Information and Communications for**

Development World Bank, 2009-01-01 Over the last decade information and communication technologies ICT have been

increasingly used to achieve development goals Developing countries including poorer ones have enjoyed rapid technological progress to help pull millions of people out of poverty ICTs help transform economic and social activities for firms governments and citizens Information and Communication for Development 2009 Scaling Up Impact the second issue of the World Bank s IC4D series focuses on the effect of increased access to advanced ICT services and development of a vibrant IT sector on sustaining growth
