**Enclosure** Gary Fields, 2017-09-05 Enclosure marshals bold new and persuasive arguments about the ongoing dispossession of Palestinians Revealing the Israel Palestine landscape primarily as one of enclosure geographer Gary Fields sheds fresh light on Israel's actions He places those actions in historical context in a broad analysis of power and landscapes across the modern world Examining the process of land grabbing in early modern England colonial North America and contemporary Palestine Enclosure shows how patterns of exclusion and privatization have emerged across time and geography That the same moral legal and cartographic arguments were copied by enclosers of land in very different historical environments challenges Israel's current rationale as being uniquely beleaguered It also helps readers in the United Kingdom and the United States understand the Israel Palestine conflict in the context of their own tortured histories

*Enclosure Acts* Richard Burt, John Archer, 2019-06-07 Enclosure the conversion of peasants' commonly held lands to privately owned pasture has long been considered a critical stage in the transition from feudalism to capitalism This book is the first however to treat in detail the literary and cultural implications of enclosure in early modern England Bringing together the work of both senior and younger scholars who represent a wide range of critical orientations *Enclosure Acts* focuses not only on the historical fact of land enclosure but also on the symbolic containment of sexuality in Elizabethan and Jacobean literary works The first type of enclosure frequently has been treated by materialists and new historicists feminists and theorists concerned with issues of gender have tended to concentrate on the second The fourteen essays collected here explore the relationships between these two ways of perceiving enclosure in the context of cultural studies Individual chapters examine the creation of territorial and social boundaries as well as the consequences of enclosure acts

*Militarizing the Environment* Robert P. Marzec, 2015-12-21 As the seriousness of climate change becomes more and more obvious military institutions are responding by taking a prominent role in the governing of environmental concerns engaging in climate change war games and preparing for the effects of climate change from conflicts due to loss of food water and energy to the mass migration of millions of people displaced by rising sea levels This combat oriented stance stems from a self destructive pattern of thought that Robert P Marzec names environmentalism an attitude that has been affecting human environmental relations since the seventeenth century *Militarizing the Environment* traces the rise of this influential mindset in America and other nations that threatens to supplant ideas of sustainability with demands for adaptation In this extensive historical study of scientific military political and economic formations across five centuries Marzec reveals how environmentalism has been instrumental in the development of today's security society informing the creation of the military industrial complex during World War II and the National Security Act that established the CIA during the Cold War Now embedded in contemporary Western thought environmentalism has even infiltrated scientific thinking transforming Darwinian

insights into a quasi theology that makes security the biological basis of existence Marzec exposes the self destructive nature of this increasingly accepted worldview and offers alternatives that counter the blind alleys of national and global security

*Claustrophilia Readings in the Erotics of Enclosure* Cary Steven Howie,2003

*The Politics of Recognition in the Age of Digital Spaces* Benjamin JJ Carpenter,2023-09-15 This book provides a philosophical analysis of the notion of selfhood that underlies identity politics It offers a unique theory of the self that combines previous scholarly work on recognition and the phenomenology of space The politics of identity occupy the centre of a contested terrain Marginalised and oppressed peoples continue to seek the transformation of our shared social world and our political institutions required for their lives to be liveable Public criticism and academic treatments of identity politics often take a disparaging view that treats it as subordinate to more general political questions about justice and the organisation of society and its institutions This book argues that these polemics ignore the numerous ways in which all politics is concerned with matters of selfhood and identity Through a rereading of Hegel s account of recognition as an ongoing and dynamic process that constitutes the self it presents selves and the categories of identity that qualify these selves as fundamentally conditioned by the environments in which they appear before themselves and others It also argues that we do the work of identity in public spaces particularly digital spaces and that these spaces shape what identities we can assume and what those identities mean Contemporary social media technologies facilitate the production of particular forms of selfhood through the combined logics of the interface the profile and the post *The Politics of Recognition in the Age of Digital Spaces* will be of interest to scholars and advanced students working in a wide range of disciplines including political philosophy phenomenology philosophy of technology sociology political theory and critical theory It will also appeal to anyone with an interest in contemporary identity politics whether as a matter of study or lived experience

*Cursed Blessings* Umberto Grassi,2024-06-21 *Cursed Blessings* explores the relationship between sexual nonconformity and religious radical dissent in the early modern Western European world While many studies have been devoted to the process of the hereticalization of nonnormative sexual practices and its use in anti heretical propaganda this book is entirely devoted to understanding the meaning of unconventional sexual behaviors from the perspective of the dissenters Divided into three parts the first focuses on the Italian peninsula and explores alternative views on sexuality inspired by Renaissance currents of anti clericalism ancient Christian heresies traditions of apocrypha of the New Testament and Rabbinic literature It also examines how embodied and gendered experiences influenced the dissenting views of religious women The second part explores how reflections on Original Sin led to the questioning of Christian assumptions regarding sex and gender highlighting the relationship between the criticism of sexual morality and disputes on free will spirituality and redemption The third part

examines how most of these threads were entwined into a more coherent philosophical framework in the writings of seventeenth and eighteenth century erudite libertines This book is designed for academic readers including graduate and undergraduate students Given its intersectional approach it will be of interest to researchers teachers and students in a wide array of fields including religious gender and sexuality studies as well as literature This book also tackles issues that are relevant to present day debates such as the problematic relations between sexuality and religion and the ongoing polemics surrounding the complicated interactions between religion and politics
