The Cognitive Basis of Institutions Shinji Teraji, 2018-02-16 The Cognitive Basis of Institutions A Synthesis of Behavioral and Institutional Economics synthesizes modern research in behavioral economics with traditional institutional economics. This work emphasizes that institution and agent are inextricably linked and that both cognitive and institutional processes coalesce to influence human decision making. It integrates cognition and institution through the behavioral economics theoretical lens of bounded rationality. Methodologically it develops game theoretical complexity and neuroeconomic solutions to unite study of the two areas. The work concludes by proposing general implications for the economic study of decisions using the cognitive institutional approach also providing specific recommendations for public policy. Reveals how institutional structures and individual actions interact and coevolve cognitively. Connects individual decision making decision making processes and institutional formation. Unites our understanding of cooperative prosocial behavior with the institutional dynamics that may create it. Discusses the implications of the behavioral institutional paradigm for paternalism and libertarianism in public policy

Koza, 2026-01-23 A little known fact about the prominent US psychologist and educator Carl E Seashore 1866 1949 is that he was deeply involved in the American eugenics movement. He was among the US academics to support eugenics long before German Nazis embraced it. A titan in a host of disciplines and a proponent of radical education reform. Seashore used his positional power to promote a constellation of education reforms consistent with central precepts of eugenics. Many of these reforms including tracking gifted and talented programs and high stakes standardized testing were adopted and remain standard practice in the United States today. He promulgated the idea that musical talent is biologically inheritable and he developed the first standardized tests of musical talent. These tests were used by early twentieth century researchers in their attempts to determine whether there are race differences in musical talent. Seashore's ideas and work profoundly shaped music education's research trajectory as well as enduring commonsense beliefs about musical ability. An intersectional analysis Destined to Fail focuses on the relationship between eugenics and Seashore's views on ability race and gender. Koza concludes that Seashore promoted eugenics and its companion euthenics because he was a true believer. She also discusses the longstanding silences surrounding Seashore's participation in eugenics. As a diagnosis and critique of the present Destined to Fail identifies resemblances and connections between past and present that illustrate the continuing influence of eugenics and the systems of reasoning that made early twentieth century eugenics imaginable and seem reasonable on education discourse and practice today. It maps out discursive citational and funding connections between eugenicists of the
