The Disinformer:

Information Evaluation Philippe Capet, Thomas Delavallade, 2014-01-07 During the reception of a piece of information we are never passive Depending on its origin and content from our personal beliefs and convictions we bestow upon this piece of information spontaneously or after reflection a certain amount of confidence Too much confidence shows a degree of naivety whereas an absolute lack of it condemns us as being paranoid These two attitudes are symmetrically detrimental not only to the proper perception of this information but also to its use Beyond these two extremes each person generally adopts an intermediate position when faced with the reception of information depending on its provenance and credibility We still need to understand and explain how these judgements are conceived in what context and to what end Spanning the approaches offered by philosophy military intelligence algorithmics and information science this book presents the concepts of information and the confidence placed in it the methods that militaries the first to be aware of the need have or should have adopted tools to help them and the prospects that they have opened up Beyond the military context the book reveals ways to evaluate information for the good of other fields such as economic intelligence and more globally the informational monitoring by governments and businesses Contents 1 Information Philosophical Analysis and Strategic Applications Mouhamadou El Hady Ba and Philippe Capet 2 Epistemic Trust Gloria Origgi 3 The Fundamentals of Intelligence Philippe Lemerrier 4 Information Evaluation in the Military Domain Doctrines Practices and Shortcomings Philippe Capet and Adrien Revault d Allonnes 5 Multidimensional Approach to Reliability Evaluation of Information Sources Fr d ric Pichon Christophe Labreuche Bertrand Duqueroie and Thomas Delavallade 6 Uncertainty of an Event and its Markers in Natural Language Processing Mouhamadou El Hady Ba St phanie Brizard Tanneguy Dulong and B n dicte Goujon 7 Quantitative Information Evaluation Modeling and Experimental Evaluation Marie Jeanne Lesot Fr d ric Pichon and Thomas Delavallade 8 When Reported Information Is Second Hand Laurence Cholvy 9 An Architecture for the Evolution of Trust Definition and Impact of the Necessary Dimensions of Opinion Making Adrien Revault d Allonnes About the Authors Philippe Capet is a project manager and research engineer at Ektimo working mainly on information management and control in military contexts Thomas Delavallade is an advanced studies engineer at Thales Communications Security working on social media mining in the context of crisis management cybersecurity and the fight against cybercrime The Devil and the Revolution Cristian Derosa, 2025-01-17 The book The Devil and the Revolution by Cristian Derosa presents a deep and provocative analysis of historical revolutions and their spiritual and cultural roots From a Christian and traditionalist perspective the author argues that the revolutions that have marked the past centuries are not isolated or spontaneous events but part of a continuous and intentional project This project according to Derosa has the ultimate goal of dismantling divine order and establishing a new era based on anti Christian principles The central thesis of the book is that the revolutionary spirit present since Lucifer s fall manifests itself in human history through heresies cultural movements and political events Derosa connects historical

episodes such as the Protestant Reformation the French Revolution and Communism to a spiritual dynamic opposing the Catholic Church and divine hierarchy He views these revolutions as stages in a continuous process driven by the idea of egalitarianism and the rejection of divine laws Derosa s narrative is grounded in a detailed historical analysis that combines cultural social and theological elements He identifies five major historical revolutions each representing a step forward in the revolutionary project The Protestant Reformation considered the first revolution is described as the initial rupture with the unity of the Church and the introduction of the concept of individual spiritual freedom The French Revolution on the other hand is portrayed as the second stage in which egalitarianism and anticlericalism gain momentum culminating in the explicit rejection of Church authority and the adoption of Enlightenment ideals However it is in his analysis of Communism and subsequent revolutions that the book reveals its most alarming dimension Derosa describes Communism as the third great stage marked by the denial of God and the attempt to create a new man in the image of materialist ideologies He argues that cultural Marxism and modern hedonism outcomes of the subsequent stages represent the penetration of the revolutionary spirit into the most intimate structures of society and the individual forming the basis of what he calls the fourth and fifth revolutions The author extensively uses theological references to support his views such as the biblical prophecy in Genesis 3 15 which announces the eternal conflict between the Woman s offspring and the Serpent s This spiritual battle he argues permeates human actions and is reflected in major revolutionary transformations The book also explores the role of Gnostic ideas as the matrix of revolutions Derosa argues that Gnosticism with its emphasis on knowledge as the path to salvation and its rejection of divine order is the spiritual root of revolutionary thought He draws parallels between ancient heresies and modern movements showing how egalitarianism moral relativism and the cult of individual freedom are rooted in Gnostic principles Derosa offers a striking interpretation of historical events often appealing to the notion of a spiritual conspiracy led by malevolent forces He also emphasizes the role of the Catholic Church as the primary barrier against the advance of the revolutionary project highlighting the importance of spiritual and cultural resistance In summary *The Devil and the Revolution* is a work that invites reflection on the foundations and consequences of major historical transformations By connecting revolutionary events to a spiritual and eschatological perspective Derosa offers a unique and provocative vision intended to challenge both Christian readers and secular critics More than just a historical analysis it is a book that proposes a philosophical and theological interpretation of the course of humanity

International Disinformation Tomasz

Chłoń, Robert Kupiecki, Filip Bryjka, 2024-12-16 Dive into the world of disinformation with this groundbreaking book Uncover how Foreign Information Manipulation and Interference FIMI shapes modern politics and society and how it impacts your own life Explore answers to key questions What are the origins and characteristics of disinformation How can we identify it How do we counteract it Packed with historical and current data this book reveals the tactics states use to manipulate information Understand strategies from micro targeting to crafting strategic disinformation campaigns This essential read
