**The Disparities** Rodrigo Toscano, 2002 A first book of poetry by Toscano      **Poetry and Work** Jo Lindsay Walton, Ed Luker, 2019-11-16 Poetry and Work offers a timely and much needed re examination of the relationship between work and poetry The volume questions how lines are drawn between work and non work how social political and technological upheavals transform the nature of work how work appears or hides within poetry and asks if poetry is work or play or something else completely The book interrogates whether poetry and avant garde and experimental writing can provide models for work that is less alienated and more free In this major new collection sixteen scholars and poets draw on a lively array of theory and philosophy archival research fresh readings and personal reflection in order to consider work and poetry the work in poetry and the work of poetry Individual chapters address issues such as the many professions occupations and tasks of poets beyond and around writing poetry s special relationship with craft work s relationship with gender class race disability and sexuality how work gets recognised or rendered invisible in aesthetic production and beyond the work of poetry and the work of political activism and organising and the notion of poetry itself as a space where work and play can blur and where postwork imaginaries can be nurtured and explored      Sustainable Work Ability and Aging Clas-Håkan Nygård, 2020-02-13 In many industrialized countries there is a sharp increase of the aging population due to a decrease in fertility rate and an increase in life expectancy Due to which the age dependency ratio rises and may cause increased economic burden among working age population One strategy to combat this problem is to prolong peoples working career A sufficient work ability is a requirement for a sustainable and prolonged employment Work ability is primarily a question of balance between work and personal resources Personal resources change with age whereas work demands may not change parallel to that or only change due to globalization or new technology Work ability on average decreases with age although several different work ability pathways exist during the life course Work related factors as well as general lifestyle may explain the declines and improvements in work ability during aging A sustainable work ability throughout the life course is a main incentive for a prolonged working career and a healthy aging Work ability and work related factors are therefore important occupational and public health issues when the age of the population increases This Special Issue Sustainable Work Ability and Aging includes in all 16 original articles and one opinion paper organized in three sections The research topics cover wide aspects of work ability from determinants older employee s coping with their work methodological issues as well as results of interventions on promoting work ability      *The Greening of London, 1920-2000* Matti O. Hannikainen, 2017-05-15 The long term development of public green spaces such as parks public gardens and recreation grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building

on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable cities
