The Drop Out Zone:

'Out of School' Ethnic Minority Young People in Hong Kong Miron Kumar Bhowmik, Kerry John

Kennedy, 2016-02-19 This book offers a comprehensive overview of out of school ethnic minority young people in Hong Kong. The focus is on the extent of the phenomena, reasons behind it, and a description of out of school life. Employing qualitative research methods and adopting a case study approach that involved fieldwork comprising 15 in-depth interviews and 2 observations with 11 out of school ethnic minority young people, this book provides detailed insights into the phenomena. Information gained from an additional 22 in-depth interviews with 20 other stakeholders related to ethnic minority education from time spent at three schools and key document analysis are also incorporated. Drawing on critical race theory, this book presents a critical discussion of the out of school issue for ethnic minority young people in a privileged Chinese context.

Routledge Handbook of International Education and Development Simon McGrath, Qing Gu, 2015-07-24 This timely Handbook takes stock of the range of debates that characterise the field of international education and development and suggests key aspects of a research agenda for the next period. It is deliberately divergent in its approach, recognising the major ideological and epistemological divides that characterise a field that draws on many traditions. Leading and emergent voices from different paradigms and contexts are afforded a space to be heard, and each section puts current debates in larger historical contexts. The Handbook is divided in four parts and book-ended by an introduction and a conclusion, the latter oriented towards the implications that the volume has for future research agendas. The first part explores major strands of debates about education's place in development theory. The second acknowledges the disciplining of the field by the education for all movement and examines the place that learning and teaching and schools play in development. Part three looks beyond schools to consider early years, adult and vocational education but focuses particularly on the return to thinking about higher education's role in development. The final part considers the changing but still important role that international cooperation plays in shaping education in developing countries. Featuring over thirty chapters written by leading international and interdisciplinary scholars, the Routledge Handbook of International Education and Development offers the first comprehensive and forward-looking resource for students and scholars.

Media can range from newspapers, magazines, comic strips, novels, CDs and music videos. These representations can influence the general public's perception of the different genders. It is important to continue exploring interactions of media and gender to dismiss personal choices but to see the larger context and potential consequences for ourselves and others.

Advertisements and pictures in magazines carry significant messages about cultural norms and values but also norms of gendered relations for both men and women Gender Equality is much debated issue in almost all the countries of the world It is more relevant in the context of developing countries where maltreatment and exploitation of women has been tradition which goes on unabated This book in two parts encompasses vital information on the problem of gender equality and allied issues Based on authentic information gathered from various authoritative sources and supported by facts and figures this has become a veritable mine of information The book we feel would prove to be of enormous relevance and immense use for social scientists social activists social planners and programme executives connected and concerned with the subject e
