Students will continue to work on their illustrations and backgrounds while learning how to use perspective to create the illusion of depth. This will be a continuation of the previous class example of a landscape, but this time students will be encouraged to draw a landscape they have found interesting or inspiring, or a landscape they have created themselves. The first part of this class will be a brief lecture about how to use perspective to create the illusion of depth. This will be followed by a demonstration of how to use perspective to create the illusion of depth, and then students will be given the opportunity to practice using perspective to create the illusion of depth in their own drawings. This will be followed by a brief discussion of how to use perspective to create the illusion of depth in their own drawings.

After this discussion, students will be given time to draw their own landscapes using perspective, and then they will be asked to share their drawings with the class.
