Personification About The Rainforest:

Environmental Communication Anabela Carvalho, Tarla Rai Peterson, 2024-12-30 This handbook reviews extant research and offers critical summaries of key topics and issues in the field enriched by authoritative analyses of specific cases and examples. It displays pluralism across a number of axes: epistemological, theoretical, geographical, cultural, and thematic. The first part offers historical routes through the international development of the field and explores the epistemological grounds of multiple strands of environmental communication studies. In aiming to map the field broadly as well as stimulating new thinking, the second part is organized along three core perspectives: arenas, voice, and place. It comprises chapters on various public spaces that are critical to the symbolic constitution of the environment and sheds light on a range of aspects and social agents that have received insufficient attention, including research about and carried out in non-Western countries. Crucially, at a time of profound environmental crisis, the final part of this book discusses possibilities and constraints to social change and the potential contributions of environmental communication research to ways of understanding and responding to the challenge.

Jesuit Missionary Cartography of the Upper Amazon, 1689 to 1789 Irina Saladin, 2025-10-01 In the early modern period, members of the Society of Jesus, working as missionaries in the so-called mission of Maynas, explored vast areas of the upper Amazon. These missionaries belonged to the very small group of Europeans who lived in the forests of the Amazon Basin for longer periods in close contact with local people. Their daily experiences in the mission, their high level of education, and their connection with the institutional structures of the Jesuit order made them key figures in the production of knowledge about the Amazon. Irina Saladin investigates the complex relationships between mission and knowledge in the context of seventeenth and eighteenth-century Jesuit maps. She analyzes how Jesuit missionary practices shaped the cartographic representation of the Amazon in the early modern era.

The Amazon Pattern Theresa C. Dintino, 2015-06-06 What does it mean to bring indigenous wisdom to the postmodern world? How do divination and ritual fit into modern society? How does one integrate ancient spiritual teachings into a western mindset while remaining true to the original meaning? *Notes from a Diviner in the Postmodern World: A Handbook for Spirit Workers* is a guidebook for both diviners and spirit workers of any tradition. In this book, Dintino describes what she calls the landscape of the otherworld revealed to her through spirits, ancestors, archangels, elemental, and light beings in her divinations. Whatever your spiritual tradition, there's always a shared landscape of the otherworld. Understanding the landscape will help you navigate your own spiritual terrain. Learning how to be an effective diviner and spirit worker also means that you must interact fully with the wisdom of the place where you live, which includes learning from all living things, including mountains and water. This powerful handbook teaches you how to heal your world by exploring interdimensional realms and ultimately becoming a spiritual steward of the Earth. When I became a diviner, I did not expect to encounter a landscape in the otherworld that I would become familiar with and navigate more easily as I continued to divine. I am still

exploring this landscape but wanted to share some of the things I have learned in order to help those interested in the dimensional realms understand better what they are seeing What I have included in this book is not meant to be rigid it is a conversation and a guide
