*Sustainable Venice: Suggestions for the Future* I. Musu, 2012-12-06 It is universally recognised that Venice and its lagoon are of such value that they constitute an international public good that must be preserved for humanity as a whole But such an ambitious task requires a diversified sustainable set of economic activities mostly focused on the production of services and non material goods This complex issue is analyzed using different approaches with a discussion of the case of Venice as an example of some of the most relevant problems concerning the relation between the environment and development in the contemporary world the trade off between preserving an ecosystem and considering it as an economic resource the evolution of different urban growth scenarios and the preservation of a physical habitat the role of immaterial production in urban economic development the nature of tourism as a sustainable activity considered from both from the environmental and cultural angles the institutional aspect of governing a process of sustainable urban development Readership A unique resource for environmental and urban managers policy analysts students of sustainable development and anyone else interested in the social and economic implications of preserving one of the most loved and celebrated cities in the world

**Convention Center Follies** Heywood T. Sanders, 2014-06-16 American cities have experienced a remarkable surge in convention center development over the last two decades with exhibit hall space growing from 40 million square feet in 1990 to 70 million in 2011 an increase of almost 75 percent Proponents of these projects promised new jobs new private development and new tax revenues Yet even as cities from Boston and Orlando to Phoenix and Seattle have invested in more convention center space the return on that investment has proven limited and elusive Why then do cities keep building them Written by one of the nation's foremost urban development experts Convention Center Follies exposes the forces behind convention center development and the revolution in local government finance that has privileged convention centers over alternative public investments Through wide ranging examples from cities across the country as well as in depth case studies of Chicago Atlanta and St Louis Heywood T Sanders examines the genesis of center projects the dealmaking and the circular logic of convention center development Using a robust set of archival resources including internal minutes of business

consultants and the personal papers of big city mayors Sanders offers a systematic analysis of the consultant forecasts and promises that have sustained center development and the ways those forecasts have been manipulated and proven false This record reveals that business leaders sought not community wide economic benefit or growth but rather to reshape land values and development opportunities in the downtown core A probing look at a so called economic panacea Convention Center Follies dissects the inner workings of America s convention center boom and provides valuable lessons in urban government local business growth and civic redevelopment

implies both a multidisciplinary approach and methodological innovations to deal with such a complex phenomenon The challenge to identify and map cultural heritage elements tangible and intangible in a pan European context has recently been dealt with in the ESPON project 1 3 3 2004 2006 Lack of adequate definitions poor databases and a showcase of national and sector differences in approaching culture as resource for development was the final balance of that explorative project These findings have prompted further case study research into the study of cultural heritage which is encapsulated in this book This publication differs from others on cultural tourism through its emphasis on spatial dynamics by analysing location and behaviour patterns in different tourism destinations by identifying the parameters of change induced by tourism and not in the least trial and error examples in policy making The book includes a rich variety of case studies mainly from all over Europe but also including cases set in Israel Cairo and India representing the views and findings of 21 international researchers and scholars in cultural tourism scanning unique situations in order to detect the common dynamics and impacts of tourismification The final objective is to propose consistent directions for policy based on empirical insights The book contributes significantly to the understanding of cultural diversity and territorial identity on the one hand and to the dynamics of tourism on the other all of which are key issues in local and regional planning and management As such they should be a source of inspiration for policy makers and an eye opener for students researchers and consultants in the field of cultural heritage and tourism and hopefully an interesting virtual trip from Savonlinna to Cairo from Santiago de Compostela to Sibiu crossing and discovering a kaleidoscope of colourful and unique cultural landscapes and tourismescapes Decanter ,1994-09 **Principles of Social Impact Assessment and Its Application to Managing the Great Barrier Reef** Gail Broome,Peter Valentine,1995 **Tourism Research Report** ,1999
