Towards a Critique of Architecture's Contemporaneity Gevork Hartoonian, 2023-02-14 Pursuing historical analogies between nineteenth century theories and the current practices captivated by digital reproducibility this book offers a critical take on architecture s contemporaneity through four essays tectonics materiality cladding and labor Fundamental to this proposition is the historicity of Gottfried Semper s theorization of architecture amidst the outpouring of new materials and construction techniques during the 1850s Starting with Semper s differentiation between theatricalization and the tectonic of theatricality this book examines thematic essential to architecture s self representation Even though the title of this book recalls the Semperian Four Elements of Architecture its argument encapsulates a unique historico theoretical project probing the tectonic of theatricality beyond Semper The invisible tie between technique and labor is the cord running through the four subjects covered in this book In exploring these subjects from the theoretical standpoint of Marxian dialectics this book s contribution is focused on but not limited to the topicality of labor today when its relationship with capital has been further obscured by the prevailing digitalization of commodity exchange value starting roughly in the 1990s Each essay examines Semper s theorization of architecture in contradistinction to the ways in which technology s mediation has dominated architecture s representation Burrowing through the invisible tie between technique and work asymptomatic of architecture s predicament in global capitalism Towards a Critique of Architecture's Contemporaneity advances the scope of architectural criticism beyond the exhausted formalism and architecture s turn to philosophy circa the 1980s and the present tendencies for presentism It will therefore be of interest to researchers and students of architectural history and theory

**Architecture, Ritual and Cosmology in China** Xuemei Li, 2023-05-31 Drawing on the author s extensive fieldwork in the Dong areas in southwest China this book presents a detailed picture of the Dong s buildings and techniques with new insights into the Dong s cosmology and rituals of everyday life meshed with the architecture and the symbolic meanings It examines how the buildings and techniques of the Dong are ordered and influenced by the local culture and context The timber bridges and drum towers are the Dong s most prominent architectural monuments Usually built elaborately with multiple roofs these bridges and drum towers were designed and maintained by the local carpenters who also built the village suspended houses in an oral tradition carried down from father to son or to apprentice They were funded entirely by the local people and the bridges tend to be built in places without great pressure of traffic or another bridge already existing close by Why does such great expense go into the Dong s buildings with elaboration How were they
