This revised and updated sixth edition of *Reference and Information Services* continues the book's rich tradition covering all phases of reference and information services with less emphasis on print and more emphasis on strategies and scenarios. *Reference and Information Services* is the go-to textbook for MSLIS and i School courses on reference services and related topics. It is also a helpful handbook for practitioners. Authors include LIS faculty and professionals who have relevant degrees in their areas and who have published extensively on their topics. The first half of the book provides an overview of reference services and techniques for service provision including the reference interview, ethics instruction, reader's advisory, and services to diverse populations including children. This part of the book establishes a foundation of knowledge on reference service and frames each topic with ethical and social justice perspectives. The second part of the book offers an overview of the information life cycle and dissemination of information followed by an in-depth examination of information sources by type including dictionaries, encyclopedias, indexes, and abstracts as well as by broad subject areas including government statistics and data, health, and legal information. This second section introduces the tools and resources that reference professionals use to provide the services described in the first half of the text. Quality and the Academic Library Jeremy Atkinson,2016-02-24 *Quality and the Academic Library: Reviewing, Assessing, and Enhancing Service Provision* provides an in-depth review and analysis of quality management and service quality in academic libraries. All aspects of quality are considered in the book including quality assessment, quality review, and quality enhancement. An overview of quality management and service quality concepts, principles, and methods leads to a detailed consideration of how they have been applied in universities and their libraries. A case study approach is used with different perspectives provided from the different stakeholders involved in the quality processes. All contributors adopt a critical reflection approach reflecting on the implications, impact, and significance of the activities undertaken and the conclusions that can be drawn for future developments. The book concludes with an overall reflection on quality management and service quality in academic libraries with a final analysis of priorities for the future. Presents a holistic view of the subject looking at reviews of academic library services, quality assurance, and assessment, quality enhancement, and service quality. Provides perspectives from authors with different experiences and responsibilities including those responsible for initiating and managing quality processes in higher education. Includes case studies where the authors not only describe the quality processes used but also seek to review and reflect on their success, limitations, and the impact of their work some time after the event. Seeks to be current, comprehensive,

and reflective by including the results of surveys interviews from senior librarians on quality in academic libraries
