James Meyer, More than any other decade the sixties capture our collective cultural imagination And while many Americans
can immediately imagine the sound of Martin Luther King Jr declaring I have a dream or envision hippies placing flowers in
gun barrels the revolutionary sixties resonates around the world China s communist government inaugurated a new cultural
era African nations won independence from colonial rule and students across Europe took to the streets calling for an end to
capitalism imperialism and the Vietnam War In this innovative work James Meyer turns to art criticism theory memoir and
fiction to examine the fascination with the long sixties and contemporary expressions of these cultural memories across the
globe Meyer draws on a diverse range of cultural objects that reimagine this revolutionary era stretching from the 1950s to
the 1970s including reenactments of civil rights antiwar and feminist marches paintings sculptures photographs novels and
films Many of these works were created by artists and writers born during the long Sixties who were driven to understand a
monumental era that they missed These cases show us that the past becomes significant only in relation to our present and
our remembered history never perfectly replicates time past This Meyer argues is precisely what makes our contemporary
attachment to the past so important it provides us a critical opportunity to examine our own relationship to history memory
