The authors of this book are providing this digital version free - it may not be redistributed, nor may any copies, in any form, be for resale purposes.

The digital version has been created by the efforts of a number of Ph.D. students in the Information Systems Department at the New Jersey Institute of Technology. There are in fact a number of thesis efforts that have been undertaken to utilize the concepts of the Delphi Method to design and evaluate groups communication systems for large groups dealing with complex problems.

If you find the material in this reproduction of the original 1975 book to be useful, we would like to suggest you make a modest contribution to the **IS graduate student fund at NJIT**.
