Personification Against Bullying

Leslie Margolin

Personification Against Bullying:

Great Is Thy Faithfulness? Robin A. Parry, Heath Thomas, 2011-09-22 Lamentations is a book that has never had a place of honor at the table of Christian spirituality. This is an unfortunate state of affairs because its challenging poetry has much to offer. This volume explores how the biblical book of Lamentations may be engaged afresh so that it can function as Holy Scripture for the ekklesia. Four main chapters consider issues in hermeneutics, exegesis, the use of Lamentations in worship and pastoral reflections. These chapters have been supplemented by seventeen reception history studies written by an international team of Jewish and Christian scholars. These studies introduce a wide range of interpretations and uses of the book of Lamentations from throughout the history of Judaism and Christianity. They include examinations of the use of Lamentations in Isaiah 40-55, the Targum Rashi, and contemporary Jewish thought, the Patristic period, Calvin, Jewish and Christian worship music, Rembrandt, and psychological and feminist interpretation. Appendices include new English translations of LXX Lamentations and Targum Lamentations.

Goodness Personified Leslie Margolin, In Goodness Personified, Leslie Margolin challenges the most common assumptions underlying gifted education. His analysis of the gifted child movement shows how scholars formed the concept of giftedness in their writings, how they provided detailed documentation of the characteristics such children were thought to embody, and how they managed to spread that vision to a community of believers. In doing so, he demonstrates that social assets as well as social problems can be viewed as social constructions, the products of competing claims.

News, Numbers and Public Opinion in a Data-Driven World An Nguyen, 2017-12-28 From the quality of the air we breathe to the national leaders we choose, data and statistics are a pervasive feature of daily life and daily news. But how do news, numbers, and public opinion interact with each other and with what impacts on society at large? Featuring an international roster of established and emerging scholars, this book is the first comprehensive collection of research into the little understood processes underpinning the uses and misuses of statistical information in journalism and their socio-psychological and political effects. Moving beyond the hype around data journalism, *News, Numbers and Public Opinion* delves into a range of more latent fundamental questions such as: Is it true that most citizens and journalists do not have the necessary skills and resources to critically process and assess numbers? How should journalists make sense of the increasingly data-driven world? What strategies, formats, and frames do journalists use to gather and represent different types of statistical data in their stories? What are the socio-psychological and political effects of such data gathering and representation routines, formats, and frames on the way people acquire knowledge and form attitudes? What skills and resources do journalists and publics need to deal effectively with the influx of numbers into daily work and life, and how can newsrooms and journalism schools meet that need? The book is a must-read for not only journalists, journalism and media scholars, statisticians, and data scientists but
