Social Policy Research:

Comparative Social Policy Patricia Kennett, 2001-08-16 What are the social policy processes and outcomes across different societies How are these shaped by social and economic conditions What are the limitations and potential of cross national research Comparative Social Policy explores the new context of social policy and considers how cross national theory and research can respond to the challenges facing welfare These challenges include changing demographic trends and economic conditions which have been accompanied by the emergence of new needs and risks within and across societies This book extends and deepens cross national research by exploring the theoretical and conceptual frameworks through which social policy and welfare systems have been understood It critically examines different policy processes and welfare outcomes as well as the ethnocentrism and cultural imperialism which has permeated cross national epistemology and methodology The author concludes by reflecting on how cross national research can illuminate the complex and diverse processes leading to discrimination and inequality across borders This leads to a consideration of how it can contribute to the implementation of welfare provision appropriate to the social and economic conditions of contemporary societies Comparative Social Policy is an essential text for undergraduate and masters level students of social policy and an invaluable reference for researchers embarking on cross national social research

The Research Relationship G. Clare Wenger, 2022-02-23 Originally published in 1987 it seemed likely that by the end of that decade if current trends continued the majority of social researchers would be working under contract to government and other agencies which commissioned policy relevant investigations This shift towards contracted and commissioned research threw into heightened relief the importance of greater understanding of the often

problematic relationship between researchers on the one hand and funding agencies and policy making bodies on the other This book was directed at both social scientists who were or would in the future be involved in social policy research and at administrators planners and policy makers who often had responsibility for funding such research and who were also its potential users The authors provide accounts of research in a wide variety of settings conducted on behalf of a diverse range of sponsors in order to confront describe and try to understand the tensions which develop between the two sides of the policy research relationship While there is of course no suggestion here that there are tailor made solutions that can eradicate difficulties the feeling is expressed that improvements in the research relationship are possible and highly desirable The primary objective of the book was to provide an impetus for greater understanding and collaboration that could lead to such improvements
