individuals successfully resist attempts by others to influence them The book groups social influence techniques according to a common characteristic for instance early chapters describe sequential techniques and techniques involving egotistic mechanisms such as using the name of one's interlocutor Later chapters present techniques based on gestures and facial

movements and others based on the use of specific words re examining on the way whether please really is a magic word In every case author Dariusz Dolinski discusses the existing experimental studies exploring their effectiveness and how that effectiveness is enhanced or reduced under certain conditions The book draws on historical material as well as the most up to date research and unpicks the methodological and theoretical controversies involved The ideal introduction for psychology
