

The background of the book cover is a painting in a style reminiscent of J.M.W. Turner. It depicts a city street scene. In the foreground, a red double-decker bus is driving along a road that curves from the bottom right towards the center. To the left of the road is a large, ornate building with a dark, multi-tiered roof and arched windows. In the background, a statue on a pedestal stands on a grassy area. The overall color palette is dominated by blues, reds, and oranges, with a soft, painterly texture.

Social Science And Social Pathology:

Social Science and Social Pathology Barbara Wootton, 2024-09-02 Originally published in 1959 this book critically examines in the light of numerous research both the relation between unacceptable behaviour and economic and social status and the validity of several popular hypotheses of the 20th Century that anti social attitudes are due to lack of maternal affection in infancy or that problem families produce problem families generation after generation The author discusses the factors affecting the growth of modern psychiatry and how this shaped attitudes towards anti social behaviour and conceptions of social work The final section of the book considers the wider methodological implications **Social Science**

Smith, 2017-02-21 This book offers one of the most comprehensive studies of social pathology to date following a cross disciplinary and methodologically innovative approach It is written for anyone concerned with understanding current social conditions individual health and how we might begin to collectively conceive of a more reconciled postcapitalist world Drawing reference from the most up to date studies Smith crosses disciplinary boundaries from cognitive science and anthropology to critical theory systems theory and psychology Opening with an empirical account of numerous interlinked carises from mental health to the physiological effects of environmental pollution Smith argues that mainstream sociological theories of pathology are deeply inadequate Smith introduces an alternative critical conception of pathology that drills to the core of how and why society is deeply ailing The book concludes with a detailed account of why a progressive and critical vision of social change requires a holistic view of individual and societal transformation Such a view is grounded in the awareness that a sustainable transition to postcapitalism is ultimately a many sided social individual and structural healing process Annals of the American Academy of Political and Social Science American Academy of Political and Social
