**Global Environment Outlook - GEO-6: Healthy Planet, Healthy People** UN Environment, 2019-06-06 Published to coincide with the Fourth United Nations Environmental Assembly UN Environment's sixth Global Environment Outlook calls on decision makers to take bold and urgent action to address pressing environmental issues in order to protect the planet and human health. By bringing together hundreds of scientists, peer reviewers and collaborating institutions and partners, the GEO reports build on sound scientific knowledge to provide governments, local authorities, businesses and individual citizens with the information needed to guide societies to a truly sustainable world by 2050. GEO 6 outlines the current state of the environment, illustrates possible future environmental trends and analyses the effectiveness of policies. This flagship report shows how governments can put us on the path to a truly sustainable future, emphasising that urgent and inclusive action is needed to achieve a healthy planet with healthy people. *Human Behavior in the Social Environment* Rudolph Alexander, Jr., 2009-12-02 Human Behavior and the Social Environment: A Macro National and International Perspective is a textbook for one of the primary courses in the social work curriculum titled Human Behavior in the Social Environment. The course is offered usually over two semesters with one focusing on micro issues (how the individual develops in relation to their social environment) on an individual, family and group level. The second section of the course typically focuses on macro issues pertaining to how an individual is shaped by their social environment by macro issues including social institutions, community and the government. This book is intended for the second sequence of the course. It takes a unique approach by incorporating international issues of globalization which has been an emerging issue in social work. Although it takes this unique perspective, it still covers the basics of macro social work on a national level. Other important areas that are not well represented in competing texts include coverage of rural issues, the impact of Hurricane Katrina on social and community resources, human rights and social justice, the increasing impact of increasing rates of incarceration and a special section focusing on crisis theory. This book has a number of key selling points. They include: A broad national and international perspective; A timely approach that examines issues such as rural communities, the impact of disaster on communities and increasing incarceration rates; Provides special emphasis on human needs and social justice; End of chapter discussion questions; A student glossary; Chapter opening photos; An appendix that includes three additional higher level macro theories which would make the book applicable to Master's level program. This book will also contain a number of features that are essential for any book to be adopted in a HBSE course. They include: End of chapter discussion questions; Instructor's manual featuring powerpoint slides and a test bank; Student study site for recommended reading; chapter summaries and flash cards.

Nontimber Forest Products in the United States Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002 A quiet revolution is taking place in America's forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose

uses have only begun to be fully realized. Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager. This book provides the first comprehensive examination of nontimber forest products (NTFPs) in the United States illustrating their diverse importance, describing the people who harvest them and outlining the steps that are being taken to ensure access to them. As the first extensive national overview of NTFP policy and management specific to the United States it brings together research from numerous disciplines and analytical perspectives such as economics, mycology, history, ecology, law, entomology, forestry, geography, and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs. The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products, an overview of uses and users, and discussions of sustainable management issues associated with ecology, cultural traditions, forest policy, and commerce. They examine some of the major social, economic, and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations. Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape from the Pacific Northwest to the Caribbean. From honey production to a review of nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands. No other volume offers such a comprehensive overview of NTFPs in North America. By examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests.
