An Introduction to Sociolinguistics Sharon K. Deckert, Caroline H. Vickers, 2011-05-19 This unique work analyzes the crisis in modern society building on the ideas of the Frankfurt School thinkers Emphasizing social evolution and learning processes it argues that crisis is mediated by social class conflicts and collective learning the results of which are embodied in constitutional and public law First the work outlines a new categorical framework of critical theory in which it is conceived as a theory of crisis It shows that the Marxist focus on economy and on class struggle is too narrow to deal with the range of social conflicts

within modern society and posits that a crisis of legitimization is at the core of all crises. It then discusses the dialectic of revolutionary and evolutionary developmental processes of modern society and its legal system. This volume in the *Critical Theory and Contemporary Society* by a leading scholar in the field provides a new approach to critical theory that will appeal to anyone studying political sociology, political theory and law.

Introducing Sociolinguistics Rajend Mesthrie, 2009-05-29 Sociolinguistics is one of the central branches of modern linguistics and deals with the place of language in human societies. This second edition of *Introducing Sociolinguistics* expertly synthesises the main approaches to the subject. The book covers areas such as multilingualism, code choice, language variation, dialectology, interactional studies, gender, language contact, language and inequality, and language and power. At the same time it provides an integrated perspective on these themes by examining sociological theories of human interaction. In this regard, power and inequality are particularly significant. The book also contains two chapters on the applications of sociolinguistics in education and in language policy and planning, and a concluding chapter on the sociolinguistics of sign language. New topics covered include speaking style and stylisation, while current debates in areas like creolisation, globalisation, and language death, language planning, and gender are reflected. Written collaboratively by teachers and scholars with first hand experience of sociolinguistic developments on four continents, this book provides the broadest introduction currently available to the central topics in sociolinguistics.
