Social Indicators:

Social Indicators, 1980 Introductory material and statistical tables on 11 topics e.g public safety social participation and use of leisure time Appendixes include sources used and glossary Index **The Handbook of Social Indicators** Robert J. Rossi, Kevin J. Gilmartin, 1980 Social Measurement and Social Indicators Michael Carley, 2025-06-30 For the early pioneers of the social indicator movement the possibilities of doing social good by developing the tools of social measurement seemed endless However in the early 1980s these high and perhaps naive hopes remained unfulfilled especially for the data needs of the policy maker If not pessimistic administrators and public policy makers were at least guarded about the usefulness of social indicators as an aid to increasingly complex decision making These difficulties reflected both policy related and methodological issues Originally published in 1981 *Social Measurement and Social Indicators* is not a how to guide on the construction of social indicators but rather a critical and optimistic view of these central issues as embodied in the literature and in practice at the time Michael Carley contrasts some of the basic problems of social measurement with government's needs for reliable information organised by their policy usefulness and statistical sophistication The book then discusses the critical relationship between social indicators and social theories and models as well as the role of social information in the policy process Later chapters look at the audience the problems and the prospects for national social reports and explore in detail three different applications of social indicators to urban analysis Throughout the book helpful examples are drawn from North American UK and European experience *Social Measurement and Social Indicators* is aimed at a cross disciplinary audience in government and the universities For students it will serve as a compact introduction to the broad field of social indicators for administrators it explores philosophical and measurement problems and suggests criteria for interpretation for researchers it places social indicator efforts into a wider policy analysis perspective with its inescapable political value judgemental and bureaucratic aspects *The OECD List of Social Indicators* Organisation for Economic Co-operation and Development. Working Party on Social Indicators, 1982 **A Guide to Social Indicators for Local Government** Southern California Association of Governments, 1975 **Social Indicators, 1985-1992**, 1996 *Social Indicators and Social Policy* Social Science Research Council (U.S.), Social Science Research Council (Great Britain), 1972 Non Aboriginal material *Measuring Social Well-being* Organisation for Economic Co-operation and Development, 1976 **Social Indicators Report**, 1987 **Social System Accounts** K. Fox, 2012-12-06 This book results from a research program on which I have spent most of my time since 1974 It addresses two of the major problems facing social system accounting how to measure and account for nonmarket activities and how to combine social and economic indicators The solution I propose is accounts based on behavior settings a concept originated by Roger G Barker more than thirty years ago Behavior settings are the natural units of social activity into which people sort themselves to get on with the business of daily life grocery stores school classes religious services meetings athletic events and so on

The descriptive power of behavior settings has been established in surveys of complete communities in the United States and England of high schools ranging in size from fewer than 100 to more than 2000 students of rehabilitation centers in hospitals and of several other types of organizations Behavior settings are empirical facts of everyday life A description of a community or an organization in terms of behavior settings corresponds to common experience In many cases small establishments are behavior settings the paid roles in behavior settings are occupations and the buildings and equipment of establishments are the buildings and equipment of behavior settings
