## **1. Introduction**

The world today is witnessing an explosion of social science research. Unlike other disciplines in the natural sciences, social science research has attracted much attention due to its dynamism and complexity (Dube and Pare, 2003). As modern societies become more complex in their structure, needs and demands, social problems have also become more complex. As a result, several social theories and social research methods have been developed and continue to develop in an effort to understand diverse social problems. Presently, social research is in the process of rapid change. This paper focuses on current methodological issues and emerging trends in social science research. It argues that the challenge for social scientists and researchers worldwide is to continue in the search for a unified consensus on what methodology might have the power and refinement to connect a proposed "grand theory" with the various midrange theories which, with considerable success, would continue to provide usable frameworks for increasing the overall knowledge of society. Social research is experiencing a paradigm shift that calls for the re-examination of current methodologies. The present review helps identify current methodological issues and trends in social science research. It is important that as social researchers, we should understand the philosophical, theoretical, and methodological debates influencing our work and careers, their implications for research and our place within them.

This discussion provides an academic forum for social scientists and researchers to reflect on the contemporary issues and emerging trends affecting their careers. This is important as this will help to shape the orientation of both old and young social researchers to be innovative and go beyond conventional boundaries. This paper also puts young social scientists - who have not yet become 'attached' to certain sets of theories, concepts and methodology - in advantageous position to understand the current issues and emerging trends in social sciences research.

The main purpose of the paper is to examine the historical, philosophical, and theoretical developments that have influenced social research methods worldwide. the article also reports on current issues and emerging trends in social research with particular reference to social research at the Tribhuvan university.

## **Social Interaction Analysis Methodological Issues:**

Social Interaction Analysis Michael E. Lamb, Stephen J. Suomi, Gordon R. Stephenson, **Depression and Aggression in Family interaction** Gerald R. Patterson, 2013-05-13 This collection updates research on family processes relating to aggression and depression It contains state of the art information and such recent methodological innovations as time series sequential analysis and method problems in the application of a structural equation modeling An ideal supplementary text and reference for graduate students and professionals in clinical social environmental and health psychology family counseling psychotherapy and behavioral medicine **Observing Interaction** Roger Bakeman, John M. Gottman, 1997-03-13 Mothers and infants exchanging gleeful vocalizations married couples discussing their problems children playing birds courting and monkeys fighting have this in common their interactions with others unfold over time Almost anyone who is interested can observe and describe such phenomena But usually scientists demand more They want observations that are replicable and amenable to scientific analysis while still faithful to the dynamics of the phenomena studied This book provides a straightforward introduction to scientific methods for observing social behavior Because of the importance of time in the dynamics of social interaction sequential approaches to analyzing and understanding social behavior are emphasized An advanced knowledge of statistical analysis is not required Instead the authors present fundamental concepts and offer practical advice *Methods of Family Research* Irving E. Sigel, Gene Brody, 2014-02-24 These companion volumes provide a behind the scenes look into the personal experiences of researchers in an effort to eliminate the lack of communication surrounding family research methodology They show how the researchers achieved their results and why they chose particular methodologies over others These volumes present more than just findings they present the real experiences of the authors in their own styles and personalities exposing the problems mistakes and concerns they experienced during their research projects Volume I presents the experiences of researchers into typical normative populations Volume II describes work with clinical atypical populations International Handbook of Behavior Modification and Therapy Alan S. Bellack, Michel Hersen, Alan E. Kazdin, 2012-12-06 The rapid growth of behavior therapy over the past 20 years has been well documented Yet the geometric expansion of the field has been so great that it deserves to be recounted We all received our graduate training in the mid to late 1960s Courses in behavior therapy were then a rarity Behavioral training was based more on informal tutorials than on systematic programs of study The behavioral literature was so circumscribed that it could be easily mastered in a few months of study A mere half dozen books by Wolpe Lazarus Eysenck Ullmann and Krasner more or less comprised the behavioral library in the mid 1960s Seminal works by Ayllon and Azrin Bandura Franks and Kanfer in 1968 and 1969 made it only slightly more difficult to survey the field Keeping abreast of new developments was not very difficult as Behaviour Research and Therapy and the Journal of Applied Behavior Analysis were the only regular outlets for behavioral articles until the end of the decade when Behavior Therapy and Behavior

Therapy and Experimental Psychiatry first appeared We are too young to be maudlin but Oh for the good old days One of us did a quick survey of his bookshelves and stopped counting books with behavior or behavioral in the titles when he reached 100 There were at least half again as many behavioral books without those words in the title *Beyond The Dyad* Michael Lewis, 2013-11-22 How are we to understand the complex forces that shape human behavior A variety of diverse perspectives drawing on studies of human behavioral ontogeny as well as humanity's evolutionary heritage seem to provide the best likelihood of success It is in an attempt to synthesize such potentially disparate approaches to human development into an integrated whole that we undertake this series on the genesis of behavior In many respects the incredible burgeoning of research in child development over the last decade or two seems like a thousand lines of inquiry spreading outward in an incoherent starburst of effort The need exists to provide on an ongoing basis an arena of discourse within which the threads of continuity between those diverse lines of research on human development can be woven into a fabric of meaning and understanding Scientists scholars and those who attempt to translate their efforts into the practical realities of the care and guidance of infants and children are the audience that we seek to reach Each requires the opportunity to see to the degree that our knowledge in given areas permits various aspects of development in a coherent integrated fashion It is hoped that this series which will bring together research on infant biology developing infant capacities animal models the impact of social cultural and familial forces on development and the distorted products of such forces under certain circumstances will serve these important social and scientific needs **Handbook of Marriage and the Family** Suzanne K. Steinmetz, Marvin B. Sussman, 2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light Today much of that has been changed Gone is the concealment of the way in which life begins gone the irrational sanctity of the home The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting We are engaged in the process of reconstructing our family institutions through criticism and discussion 1938 pp 3 4 **Research in Biopolitics** Albert Somit, Steven A. Peterson, 1996 Part of a series presenting research in biopolitics This fourth volume contains essays by various contributors on topics such as nonparticipant observational research methods visual recording
