The Construction of Social Reality John R. Searle, 2010-05-11 This short treatise looks at how we construct a social reality from our sense impressions at how for example we construct a five pound note with all that implies in terms of value and social meaning from the printed piece of paper we see and touch In *The Construction of Social Reality* eminent philosopher John Searle examines the structure of social reality or those portions of the world that are facts only by human agreement such as money marriage property and government and contrasts it to a brute reality that is independent of human agreement Searle shows that brute reality provides the indisputable foundation for all social reality and that social reality while very real is maintained by nothing more than custom and habit

The Nature of Social Reality Emanuele Fadda, Alfredo Givigliano, Claudia Stancati, 2014-10-17 Searle's theory of social reality is increasingly meeting with worldwide recognition and is undoubtedly the most prominent theory of social ontology at least in the post analytical tradition even if actual research in this domain is engaged in critical confrontation with it Searle's approach continues to shape the debate but his construction is more and more sharply dissected both in its details and in its general assumptions Furthermore new perspectives not rooted in the analytical

John Searle and the Construction of Social Reality Joshua Rust, 2005-12-15 In 1995 John Searle published *The Construction of Social Reality* a text which not only promises to disclose the institutional backdrop against which speech takes place but initiate a new philosophy of society Since then *The Construction of Social Reality* has been subject to a flurry of criticism While many of Searle's interlocutors share the sense that the text marks an important breakthrough he has time and again accused critics of misunderstanding his claims Despite

Searle's characteristic crispness and clarity there remains some confusion among both philosophers and sociologists regarding the significance of his proposals. This book traces some of the high points of this dialogue leveraging Searle's own clarifications to propose a new way of understanding the text. In particular, Joshua Rust looks to Max Weber in suggesting that Searle has articulated an ideal type. In locating *The Construction of Social Reality* under the umbrella of one of sociology's founding fathers, this book not only makes Searle's text more accessible to the readers in the social sciences but presents Max Weber as a thinker worthy of philosophical reconsideration. Moreover, the recharacterization of Searle's claims in terms of the ideal type helps facilitate a comparison between Searle and other social theorists such as Talcott Parsons.
